

## FLATWORLD SOLUTIONS CREATED A TASK MANAGEMENT APP FOR AN AUSTRALIAN CLIENT

### The Client

The Australian client is a provider of cloud-based solutions for job safety across the country.

### Client's Requirement & Challenges

The client wanted the help of a mobile app development partner to develop a project-based task management app that would take over tasks across the enterprise. Flatworld Solutions was contacted for the task because we had the infrastructure and an experienced team to

deliver the project within the estimated budget.

The client required a highly intuitive app centered on features such as collaboration, user engagement, and connectivity. They wanted a smart interface that enabled collaboration by a "common wall" platform for seamless sharing of images, files, and documents.

### Our Solution

We made a detailed analysis of the client's need and rolled out a [development strategy](#) that resulted in an intuitive iOS app. The iteration for Android platform was underway and was planned after the development of the current project. Our native app development approach facilitated fine-tuning the performance to match the device hardware. We offered the following solution as part of the mobile app development services -

- + Enabled real-time collaboration for allowing users to create, develop, and assign tasks by integrating functionalities through a single platform
- + We implemented a profile-based strategy to let users pull real-time profiles and task updates from other users
- + We developed image sharing support that allowed users to view the image in high-resolution with lossless magnification
- + CometChat was integrated to let users collaborate and engage with each other by text, video, and audio

### The Results

The results were positive and FWS earned the client's trust as we delivered a high-quality app that inclined with their specifications. Our [cost-effective app development](#) solutions increased the collaboration between users and enhanced the functionality and performance of their business. The integration of CometChat allowed users to transmit and receive communications with ease.

### Outsource App Development to FWS - Leader in Software Development
