REAL WOOCOMMERCE STORES SUBMITTED BY THEIR MAKERS

Telldus

Telldus is a Swedish home automation brand.

When it comes to a **smart home**, the possibilities are nearly endless. Telldus aims to simplify their customers' everyday lives to spend time on things that matter.

Control lighting from a mobile phone, wake up to freshly brewed coffee or **automatically charge garden tools** overnight. Monitor security and keep track of your energy consumption – it's all possible with the Telldus Smart Home system. Compatible with Google Assistant and Amazon Alexa, you're able to control each smart device with your voice too.

"We believe that simple solutions to small everyday problems can increase one's quality of life tremendously."

This **multilingual WooCommerce store** was brought to life by Swedish WooExperts **Wallmänder & Co**. They created a custom, modern theme, integrating with essential enterprise resource planning (ERP) and product information management (PIM) systems.
