

Securing Sensitive Research to Provide Safer, Cleaner Energy to the World

The Business Challenge.

Prevent unauthorized access to and throughout the 180-hectare research facility aimed at developing a safe, limitless and environmentally responsible energy source.

The Solution.

A Unisys-led consortium designed and supported an integrated solution spanning perimeter and surveillance security, identity and access management, command and control systems, circulation control and monitoring, communication security, forensics, and human factor integration.

Results and Benefits.

- Completed thorough analysis of complex interactions of many stakeholders, resulting in an appropriate design of the physical security
- Achieved a completely secure environment for the world's largest experimental fusion facility
