

## Website re-design for UHealth's Nephrology Fellowship Training Program website.

The Katz Family Division of Nephrology and Hypertension provides world-class, comprehensive clinical care to patients with all forms of acute and chronic kidney diseases, and maintains one of the nation's busiest center for kidney transplantation.

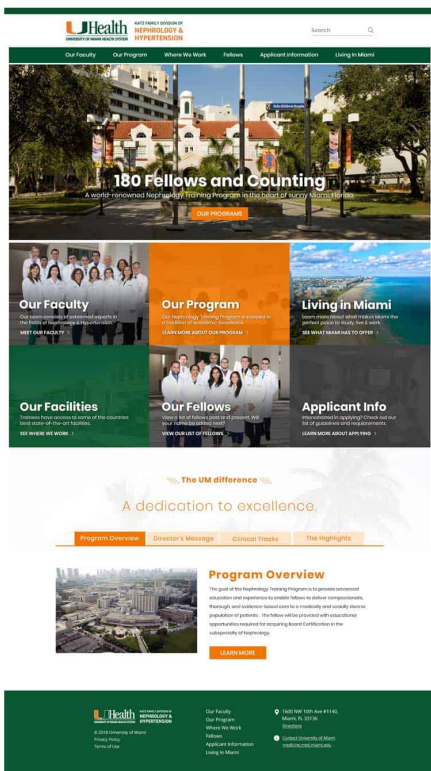

### The challenge

The University of Miami's Nephrology department retained FUZE to re-design their Nephrology Fellowship Training Program website, which was dated and lacked the fresh modern look-and-feel portrayed by many of their peers.

The main challenge was creating a site that was colorful and fun to emulate Miami's vibrant culture, while remaining professional and serious enough to represent UM's Miller School of Medicine, and UM as a whole.

- + Custom Website Development
- + Custom Creative Design
- + Responsive Web Design
- + On-Site SEO
