

Fueling Sustainability: How A-Gas Leveraged Yooz for a Greener Future

Industry: Oil & Gas Extraction

Location: Bowling Green, OH

Employees: 350+

Invoices: 4,500/month

ERP: Sage Intacct

"What Yooz does is simplify. Features like tagging and commenting directly in the platform have saved us countless emails and trips to each other's desks."

Amanda Marable, AP Specialist

⊗ Previous Pain Points

Duplicate data entry

Lengthy approval cycles

Time-consuming invoice processing

Limited visibility and tracking

✓ The Yooz Solution

Multi-channel invoice scanning with OCR and **AI-powered** data extraction, recognition, and verification.

Streamlined processes with customized approval alerts for timely payments.

Unlimited customizable workflows with tailored approval levels.

Centralized, cloud-based data storage with 24/7 remote access.

A-Gas is a global leader in refrigerant lifecycle management, recognized for its groundbreaking processes in recovering, purifying, and repurposing refrigerants and fire protection gases. By actively preventing harmful emissions, A-Gas plays a key role in combating global warming and fostering sustainability.

With operations spanning the US and Canada plus an impressive \$200 million in annual revenue, A-Gas has serviced as a cornerstone of the industry for over 30 years. Driven by a commitment to sustainability, A-Gas ensures eco-friendly practices are part of its core business practices.

⊗ The Challenge

When AP Specialist Amanda Marable joined A-Gas in 2018, the accounts payable process was completely manual. Invoices were received on paper, coded by hand, and physically routed for approvals. Despite upgrading to Sage Intacct in 2022, inefficiencies remained. For example, the company used DocRecord, a basic invoice approval system, but it didn't integrate with Sage Intacct, requiring double data entry. This not only slowed workflows but also increased the risk of errors.

Amanda described her frustration: *"I spent hours manually collecting invoices, entering data, and chasing approvals. It felt like I was always behind."* Corporate Controller Megan Rice agreed, stating, *"Every invoice had to be entered twice, and the system didn't support remote work. We knew we needed a better solution."*

"Before Yooz, I always felt like I needed to play catch-up. Now, I confidently finish my work each day, leaving room to focus on other priorities."

Amanda Marable, AP Specialist

✓ The Solution

In early 2024, A-Gas attended the Sage Transform conference with a clear goal: find the ideal AP automation tool. After evaluating several vendors, the team narrowed the options to three and ultimately selected Yooz. The decision was driven by Yooz's flexibility, seamless integration with Sage Intacct, and, ultimately, its competitive pricing.

"We have over 100 unique workflows, and Yooz could handle them without costly customizations," Megan explained. *"Other systems couldn't offer that flexibility."* For Amanda, Yooz's ability to eliminate manual bottlenecks was a game-changer: *"The automation Yooz provides is incredible. It can do in minutes what used to take me hours. The team left the conference confident they'd found the right partner to transform their AP processes."*

"We have over 100 unique workflows, and Yooz stood out because of its ability to accommodate our complex approval processes. Other solutions lacked the flexibility we needed or required costly customizations, which we wanted to avoid."

Megan Rice, Corporate Controller

The Impact

Since adopting Yooz, A-Gas has seen improvements beyond just accounts payable. Managers like Megan value the real-time access to invoices, approvals, and comments, which makes month-end variance analysis and audits smoother. *"At month-end, we no longer have to dig through emails or track down invoices. Everything is accessible and accurate,"* Megan explained. For Amanda, Yooz has transformed her role, shifting her focus from repetitive tasks to strategic contributions. *"Yooz has completely changed my workday,"* she said.

Looking ahead, A-Gas plans to extend Yooz's capabilities to additional processes like gas credit calculations.

Confident in Yooz's adaptability, the company is excited to further streamline operations while continuing its mission of sustainability and innovation.
