FALL 2025  
Customer Success Report

## eDiscovery Software Category

eDiscovery (electronic discovery) software allows you to review and use electronic information and documents during litigation. Corporate legal units and law firms utilize eDiscovery solutions to gather all files and related metadata, filter information that is beyond the law scope, and then assess individual files to decide their relevance to the case. Before this, a subpoena for electronic information is sent to concerned parties, which specifies stipulations like the file types, pertinent content, dates considered, and others.

Many eDiscovery tools integrate with file storage or backup and database platforms to streamline data collection and import processes. They also integrate with case management products that groups this information with all other data related to particular cases.

## Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

**The overall Customer Success ranking is a weighted average based on 3 parts:**

### CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

### MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

### COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

## Award Levels

### MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

### TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

### RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

“Often we need to progress and complete disclosure exercises as soon as possible, and DISCO’s high-speed uploader allows us to begin uploading straight away. We give the client log in details and they begin the upload, meaning their first experience of using the platform demonstrates the speed gains they will later become accustomed to.”

EMILY HUNT  
SOLICITOR, BEALE & COMPANY

“The DISCO team was responsive, helpful, and patient. We enjoyed getting to share the Ediscovery and Case Builder technologies with our colleagues – it was great to show off what DISCO empowers us to do. We were all very impressed with the platform and with the support we received.”

SALLIE WOODSELL  
PARALEGAL, SMYER KAPLAN & VESELKA, L.L.P.

“Thanks to DISCO, our client got a fixed fee cap, and the budget conversation was over. Without DISCO Review, it would have chewed up most of my client’s litigation budget and kept us from doing the fun parts of litigation.”

LEADING INTELLECTUAL PROPERTY COMPANY

“It’s honestly a no-brainer to use DISCO Case Builder. It allowed us to search and compile depositions in a way we couldn’t have otherwise.”
