FALL 2026
Customer Success Report

Application Performance Management Software Category

Application Performance Management (APM) software is also known as application performance monitoring software. It detects and diagnoses complicated application performance issues to enable companies to maintain a high level of service. The solution helps organizations to track the performance metrics of their vital applications, get timely notifications if there are any performance problems, and produce reports for regular performance analysis.

Customer Success Report

Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT DATADOG

Datadog is a monitoring service that brings together data from servers, databases, applications, tools, and services to present a unified view of the applications that run at scale in the cloud. These capabilities are provided on a SaaS-based data analytics platform that enables Dev and Ops teams to work collaboratively in the infrastructure to avoid downtime, resolve performance problems and ensure that development and deployment cycles finish on time.

FEATURED TESTIMONIALS

“Using Datadog allowed us to pinpoint where we needed to tune the query and we then connected the product team responsible for the code. Ultimately, one of our DBAs tuned the performance and improved the query, which allowed us to get ahead of any degradation in the customer experience.”

MORGAN GOOSE
INFRASTRUCTURE GROUP LEAD, AUTODESK

“With Datadog’s high-fidelity cost data, the savings opportunities we estimated were extremely accurate, which gave us confidence after the first couple of exercises that we could share this across other teams and ultimately provide an even better customer experience.”

YANNIS SPILIOPOULOS
TECH LEAD, PRODUCTION INFRASTRUCTURE, ASANA

“By using Datadog LLM Observability, we’ve improved response accuracy and reduced latency, ensuring faster, more reliable insights for our customers.”

NICOLAS BUSTAMANTE
CHIEF EXECUTIVE OFFICER, FINTOOL

“Datadog allows us to measure the business impact of changes and have a single point of truth across all teams.”

ZBIGNIEW KAMIŃSKI
HEAD OF SRE, BOOKSY

FEATURED TESTIMONIALS

“Dynatrace was ideally suited to become the long-term partner we were looking for. Arada is growing at a rapid pace, and so we didn't just need an observability solution – we needed a partner that could evolve with us over time.”

ABDUL RAHIM
SENIOR MANAGER, IT INFRASTRUCTURE AND OPERATIONS, ARADA

“Dynatrace is really useful – customers are amazed we've got that level of oversight over the journey, so it's another opportunity where we can surprise and delight.”

MATT BARNES
ONLINE CUSTOMER SERVICE DIRECTOR, NEXT

“With Dynatrace we can do so much more than monitoring and advanced observability – we can get the data from logs to support all areas of the business.”

MATEUSZ PIASTA
LEAD SITE RELIABILITY ENGINEER, INPOST

“With Dynatrace, we can ensure our applications work as designed around the clock.”

FEATURED TESTIMONIALS

“LogicMonitor delivers a robust monitoring platform that gives us deep visibility into our hybrid, distributed, and highly complex network environment. What really stands out is how closely the product evolves in line with real customer needs — quickly and with purpose. This creates new opportunities for us to explore AI, automation, and quality management, all within the framework of a strong, strategic partnership.”

PATRICK MOSBERGER
HEAD OF ICT INFRASTRUCTURE, MIGROS

“LogicMonitor just fit the need we had - from customizable dashboards and a wonderful UI to predictive failures, text message alerts and the ability to dive into any kind of anomalies that can be seen from historic data. LogicMonitor was a great package solution.”

MATT FRESHWATER
INFORMATION TECHNOLOGY MANAGER, MINNESOTA VIKINGS

“Because LogicMonitor was able to solve both the scalability issue and the timeliness, it was also a big deal that we could automate a lot of the customization that we needed.”

NATHAN CUSTIS
MONITORING ENGINEER, BANDWIDTH

“[LogicMonitor is] great for keeping an eye on infrastructure at a small scale (office-wide) or large scale (planet-wide).”

FEATURED TESTIMONIALS

“Having the NETSCOUT nGeniusONE dashboard gives us a 'one-stop shop' in application visibility. It also allows other IT specialties to monitor their services more proactively, keeping ahead of service related issues. All of this helps to improve customer service and provide more value to the organization. It is an extremely reliable product with excellent customer support.”

IT MANAGER
LARGE ENTERPRISE HEALTH CARE COMPANY

“Companhia Energy, a Brazilian utilities company, agrees that NETSCOUT's solutions powered by Adaptive Service Intelligence™ (ASI) technology offers a unique and holistic view of service dependencies and interrelationships into their enterprise network.”

ESDRAS SILVA
IT SYSTEMS ANALYST, COMPANHIA ENERGY

“With nGeniusONE from NETSCOUT I get reports that show where the performance problem was created. The nGeniusONE solution helps reduce time spent searching for a root cause and increases the time available to spend on other functions.”

NETWORK ADMINISTRATOR
GLOBAL 500 AEROSPACE & DEFENSE COMPANY

“The nGeniusONE product provides real-time performance views for all IT services critical to our business.”

FEATURED TESTIMONIALS

“Now, New Relic is used by our customer service team and others throughout the organization who haven't previously had visibility into these metrics. They can see the outcomes of the technical processes that they depend on. That's given them more agency with customers and in collaborating with us.”

CHRIS CHOLETTE
VP OF ENGINEERING AND SRE, NAVAN

“With New Relic, we can detect issues in minutes, even under sudden load. For example, during a recent spike on a major customer's storefront, we identified the service causing slowness in less than 15 minutes. New Relic gave us early insights to mitigate the impact and keep our systems stable.”

AMBOJ GOYAL
DIRECTOR OF ENGINEERING, FYND

“With New Relic, we have visibility down to the code level, with application metrics that help us be data-driven, respond to incidents immediately, and identify and resolve issues before they impact customers.”

FRANK DORNBERGER
DEVSECOPS TEAM LEAD, MOVINGIMAGE

“The rich integration New Relic offers with AWS products and features, and the seamless usability of their tooling helped us quickly scale monitoring across our entire cloud infrastructure.”

FEATURED TESTIMONIALS

“AutoPilot’s JMX abilities exceeded our requirements significantly, and have far greater functionality than, and is vastly superior to anything else we looked at. The team was able to monitor and manage one of our Java application in less than 30 minutes, with minimal effort. No other product was able to do so much in so little time, requiring no training of existing staff. In addition, the same JMX solution can be leveraged to monitor and manage the Weblogic “application server platform and related objects.”

LARGE STATE AGENCY

“Autopilot’s correlated monitoring of other processes that are related to MQ, such as the Trigger monitor and Lister processes, have been a huge advantage for us with AutoPilot that we didn’t have with Candle. Before we had AutoPilot for example, if the Queue Manager was up but the Trigger monitor was down, messages would just lay in the queue without any warning. Already, AutoPilot has proven to consistently do a good job watching out for those kinds of things.”

STATE GOVERNMENT

“AutoPilot’s Complex Event Processing engine implemented on MS SQL Server for proactive error determination, its flexibility in alerting, its enhanced message editing tool based on our specifications, and the product’s monitoring for the oldest message capabilities have truly provided the robust solution we needed to guarantee high availability for our applications and high service levels for our customers.”

TONY KONCZAK
SENIOR MAINFRAME SUSTAINING ENGINEER, FISERV

“Compared to our old homegrown system, AutoPilot has proved much easier to manage and far more cost-effective. It doesn’t require a lot of tinkering, alerts us when queue managers go down or queues fill up, and keeps the MQ environment running properly or alerts us when it isn’t.”
