FALL 2026
Customer Success Report

Data Catalog Software Category

Data catalog software is designed to organize, manage, and facilitate access to an organization's data assets. It serves as a centralized repository that indexes and categorizes metadata, making it easier for users to discover, understand, and use data effectively. A data catalog typically includes features like search and discovery tools, metadata management, data lineage tracking, and collaboration capabilities.

The adoption of data catalog software brings several advantages. It enhances data governance by ensuring that data is used in compliance with policies and standards. It promotes collaboration among teams by facilitating knowledge sharing about available datasets. Moreover, it aids in maximizing the value of data assets by improving accessibility and usability. In summary, data catalog software plays a pivotal role in managing the complexities of modern data environments, offering a structured and organized approach to handling an organization's data resources.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT ALATION

Alation

Alation is the leader in enterprise data intelligence solutions, including data search & discovery, data governance, data stewardship, analytics, and digital transformation. Alation's initial offering dominates the data catalog market. Thanks to its powerful Behavioral Analysis Engine, inbuilt collaboration capabilities, and open interfaces, Alation combines machine learning with human insight to successfully tackle even the most demanding challenges in data and metadata management. More than 500 enterprises drive data culture, improve decision-making, and realize...

FEATURED TESTIMONIALS

“Unity Catalog is used to govern data access and security, making data available in different technologies. Alation brings metadata to the table for self-service data access through features like the Business Glossary, wiki pages, and additional context about the data beyond just the structure and location. This enables more efficient decision-making across the organization.”

NATE SYLVESTER
VICE PRESIDENT OF ARCHITECTURE, 84.51°

“Alation helps the business uphold our governance standards so anybody coming in can get their data quickly and efficiently, and make the right decisions.”

AMY KEELTY
INFORMATION STRATEGY & GOVERNANCE DIRECTOR,
AMERICAN FAMILY INSURANCE

“We see Alation as an effective enabler of our strategy. Alation is the central data intelligence platform that provides a solid risk avoidance solution for automation.”

DARYL SHORT
SENIOR BUSINESS OUTCOMES ANALYST, LOYALTY NZ

“The endorsing and deprecating feature in Alation is really important to keeping knowledge at a current state.”

ABOUT ATLAN

atlan

Atlan is a modern data collaboration workspace (like Github for engineering or Figma for design). By acting as a virtual hub for data assets ranging from tables and dashboards to models & code, Atlan enables teams to create a single source of truth for all their data assets, and collaborate across the modern data stack through deep integrations with tools like Slack, BI tools, data science tools and more.

ABOUT AWS GLUE

AWS Glue is a fully managed extract, transform, and load (ETL) service that makes it easy for customers to prepare and load their data for analytics. You can create and run an ETL job with a few clicks in the AWS Management Console. You simply point AWS Glue to your data stored on AWS, and AWS Glue discovers your data and stores the associated metadata (e.g. table definition and schema) in the AWS Glue Data Catalog. Once cataloged, your data is immediately searchable, queryable, and available for ETL.
