FALL 2026
Customer Success Report

eDiscovery Software Category

eDiscovery (electronic discovery) software allows you to review and use electronic information and documents during litigation. Corporate legal units and law firms utilize eDiscovery solutions to gather all files and related metadata, filter information that is beyond the law scope, and then assess individual files to decide their relevance to the case. Before this, a subpoena for electronic information is sent to concerned parties, which specifies stipulations like the file types, pertinent content, dates considered, and others.

Customer Success Report

Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

“Gibraltar has long been a jurisdiction which attracts some of the biggest companies. We have organizations from around the world which have established company structures here, including many of the largest gaming companies and a significant percentage of insurance companies. All of that means commercial litigation is a thriving industry.”

SAMUEL MARRACHE
SENIOR ASSOCIATE, HARNESS IP

“Because of the way ediscovery platforms worked, lawyers conducting a case often had the least knowledge about the documents that were assembled, the formats in which clients and opposing parties kept their data, and how the review was conducted, all essential to understanding how to approach and judge a case. It was not ideal.”

“The Competition Authority needed a forensic tool to handle all the seized data we’re collecting on dawn raids under court orders. We collect complete mailboxes, SharePoint files, system files and folders. we need a system that can handle a lot of emails and large data volumes with integrity, trustworthiness, and effectiveness, including the chain of custody for all the evidence we collect.”

KARSTEIN HAUKÅS
SENIOR ADVISOR, NORWEGIAN COMPETITION
AUTHORITY

“Organizing what is needed for e-discovery requires the use of multiple tools, heterogeneous among themselves, sometimes leading to compatibility issues or the need to convert the files involved. Transferring information between tools requires a lot of manual work, which can be time-consuming and prone to errors. Furthermore, the use of multiple different tools results in a significant loss of efficiency, with repercussions on meeting deadlines.”

MICHELE FERRAZZANO
