FALL 2026
Customer Success Report

Software Composition Analysis Software Category

Software Composition Analysis (SCA) is the procedure of automating the visibility into open source software (OSS) utilization for the purposes of license compliance, security, and risk management. With the increasing use of open source (OS) in software in all sectors, there is a growing need to track components to safeguard firms from open source vulnerabilities and issues. Most software production includes OS which makes it hard to do manual tracking. This increases the need to utilize automation to scan dependencies, binaries, and source code.

Customer Success Report

Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT CONTRAST SECURITY

Contrast Security is the world's leading provider of security technology that enables software applications to protect themselves against cyberattacks, heralding the new era of self-protecting software. Contrast's patented deep security instrumentation is the breakthrough technology that enables highly accurate assessment and always-on protection of an entire application portfolio, without disruptive scanning or expensive security experts. Only Contrast has sensors that work actively inside applications to uncover vulnerabilities, prevent data breaches, and secure the entire enterprise from development to operations, to...

ABOUT DATADOG

Datadog is a monitoring service that brings together data from servers, databases, applications, tools, and services to present a unified view of the applications that run at scale in the cloud. These capabilities are provided on a SaaS-based data analytics platform that enables Dev and Ops teams to work collaboratively in the infrastructure to avoid downtime, resolve performance problems and ensure that development and deployment cycles finish on time.

FEATURED TESTIMONIALS

“Using Datadog allowed us to pinpoint where we needed to tune the query and we then connected the product team responsible for the code. Ultimately, one of our DBAs tuned the performance and improved the query, which allowed us to get ahead of any degradation in the customer experience.”

MORGAN GOOSE
INFRASTRUCTURE GROUP LEAD, AUTODESK

“Datadog has become embedded into our way of working —it’s the norm at Go1. Teams are proactively notified about any potential issues before they escalate and interrupt services.”

JON DUCROU
EXECUTIVE VICE PRESIDENT OF ENGINEERING AND DATA, GO1

“With a unified implementation of Datadog, we’ve drastically reduced the time it takes to resolve performance issues. What used to take days now takes hours.”

MICHAEL KRAUT
DIRECTOR OF CLOUD OPERATIONS, NECTAR

“Everything that Datadog has done so far has enabled us to scale far more easily.”

IMAD SHATALI
SENIOR PLATFORM ENGINEER, CAPTUR

FEATURED TESTIMONIALS

“There wasn't really anything in place for managing the full lifecycle of dependencies, We also had an ad hoc approach where someone would hear about a new CVE or critical issue and then we'd fix it. This wasn't scalable, so we needed something automated that gave developers the ability to manage this workflow themselves.”

CHARLIE STOCKER
SECURITY ENGINEER, DEPOP

“Multiple tools, created in multiple languages, gave outputs like JSON, SARIF, and YAML, among others. Each extension had its own format with nested labels, etc. Moreover, when the number of repositories grew, the false positives detected also increased. So the data became increasingly unmanageable.”

LEANDRO SANGINETTO
TECHNICAL EXPERT ENGINEER, POMELO

“It turned out the biggest risk was the lack of observability of our supply chain. We found in different teams and different tribes—it was all a different level of maturity.”

JOHN SMITH
DOMAIN ARCHITECT - SECOPS, DFDS

“you've moved into the cloud. You've got your cloud migration started. How did the security part of the process get started, and what were some of the early lessons from that?”

ABOUT SONATYPE

The Sonatype journey started 10 years ago, just as the concept of “open source” software development was gaining steam. From our humble beginning as core contributors to Apache Maven, to supporting the world’s largest repository of open source components (Central), to distributing the world’s most popular repository manager (Nexus), we’ve played a meaningful role in helping the world embrace the power of open innovation. Over time, we witnessed the staggering volume and variety of open source libraries that began flowing into every development environment in the world. We understood that when open...

FEATURED TESTIMONIALS

“Revenera offered the out-of-the-box solutions and integrations we needed to support our business model. The transition from a hardware to software model was a learning process and we looked to Revenera for best practices. We're benefiting from its experience in the industry as we continue to grow our business and do more with its software monetization platform.”

TAPAN MOHANTI
VICE PRESIDENT, OPERATIONS & MANUFACTURING,
TERADICI

“The ability to rapidly include entitlements for our new offerings without having to build it from scratch each time is a tremendous benefit for our business and for our customers. We're able to bring new offerings to market more quickly while our customers enjoy a unified and consistent experience that makes it easy to get up and running.”

MARK ROCES
VP, DIGITAL OFFER MANAGEMENT, EATON

“Before partnering with Revenera, we relied on a legacy crypto-based licensing system, which lacked modern features and relied on outdated technology that posed potential security vulnerabilities to our products. As our user base grew, the need for a robust, scalable solution became more urgent.”

CHRIS MAEDER
ENGINEERING DIRECTOR, CIVILGEO

“Revenera was there in the trenches with us through a major customer event, strengthening our relationship and ensuring we can count on them when needed. Revenera offers valuable insights as we continue to develop as a premiere software and solutions company.”

STEVE LEGOFF
VICE PRESIDENT PMO & BUSINESS STRATEGY
OPERATIONS, ZEBRA TECHNOLOGIES
