“Look no further, SuperSaaS is the best online appointment booking software! This is the best scheduling software I found after trying 5 others, it can do almost anything you could want, and the guys in support are quick and helpful. It's even free if you don't have that many appointments. As it can do so much it does take a little while to figure out how to set it up, but it is well worth the time. I have used it for 2 different business needs, first, as a student booking system to allow university students to book an appointment with a technician and the other in a tattoo parlor to book an appointment for a tattoo. In both cases the system worked brilliantly.”

“What's really great is that the person who wants to make an appointment doesn't have to log in. So many schedulers make one do this and this was the only one I found that didn't and let me show when I was available. Another feature which I really love is the ability to schedule appointments with, for example, an hour's break in between. Perfect!”
