

# ETL Software Category

## ETL Software Category

ETL software enables companies to organize data transfer from various sources into the main database of a Business Intelligence (BI) platform. These sources can include software tools like HR and CRM, data files like XML and CSV, cloud-hosted data storage applications, and in-house databases. Inaccurate business data can result in the generation of wrong intelligence reports and analyses.

An ETL program comprises of three components: Extract: Reads information from different software solutions and databases. Transform: Carries out data formatting and cleaning tasks on the gleaned data to ensure its format (such as numbers, date, and text) is consistent with the data warehouse headers or fields (such as name, contacts, and payment details). Load: Transfers data after the second stage (i.e., data conversion) to the data warehouse. You can load this data into either an on-premise or cloud-based data warehousing system.

# Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

## CONTENT SCORE

- ▢ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ▢ Customer reference rating score
- ▢ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ▢ Total # of profile views on FeaturedCustomers platform
- ▢ Total # of customer reference views on FeaturedCustomers platform

## MARKET PRESENCE SCORE

- ▢ Social media followers including LinkedIn, Twitter, & Facebook
- ▢ Vendor momentum based on web traffic and search trends
- ▢ Organic SEO key term rankings
- ▢ Company presence including # of press mentions

## COMPANY SCORE

- ▢ Total # of employees (based on social media and public resources)
- ▢ Year-over-year change in # of employees over past 12 months
- ▢ Glassdoor ranking
- ▢ Venture capital raised

## Award Levels

### MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

### TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

### RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

#### ABOUT AWS GLUE

AWS Glue is a fully managed extract, transform, and load (ETL) service that makes it easy for customers to prepare and load their data for analytics. You can create and run an ETL job with a few clicks in the AWS Management Console. You simply point AWS Glue to your data stored on AWS, and AWS Glue discovers your data and stores the associated metadata (e.g. table definition and schema) in the AWS Glue Data Catalog. Once cataloged, your data is immediately searchable, queryable, and available for ETL.

### Featured Testimonials

“AWS Glue DataBrew provides a visual interface that enables both our technical and nontechnical users to analyze data quickly and easily. Its advanced data profiling capability helps us better understand our data and monitor the data quality.”

TAKASHI ITO  
GENERAL MANAGER OF MARKETING PLATFORM PLANNING DEPARTMENT, NTT DOCOMO

“Beeswax uses Amazon S3 and AWS Glue Data Catalog to build a highly reliable data lake that is fully managed by AWS. Our platform leverages the AWS Glue Data Catalog integration with Amazon EMR in Hive and SparkSQL applications to deliver reporting and optimization features to our customers.”

RAM KUMAR RENGASWAMY  
CHIEF TECHNOLOGY OFFICER, BEESWAX

“AWS Glue DataBrew has sophisticated data profiling capabilities and a rich set of built-in transformations. This will enable our data engineers to easily explore new data sets in a visual interface, and allow analysts to shape the data for their analytics solutions.”

JOHN MAIO  
DIRECTOR, DATA & ANALYTICS PLATFORMS ARCHITECTURE, BP

“My data team was familiar with AWS solutions from previous job roles, so we believed we could build our analytics infrastructure on AWS in one month instead of up to three for an on-premises solution. We found AWS reduced our infrastructure costs by 20 percent compared to an on-premises infrastructure.”

AZBY LUTHFAN  
HEAD OF TECHNOLOGY, AMARTHA

### ABOUT FIVETRAN

Fivetran is the easiest way to replicate data into your warehouse. They've built the only zero-maintenance pipeline, turning months of on-going development into a 5-minute setup. Their connectors bring data from applications and databases into one central location so that analysts can unlock profound insights about their business.

### Featured Testimonials

“Fivetran software has allowed me to manage a vast majority of my major ETL integrations without actually having to write or maintain any code. This has been greatly beneficial for my time as I'm now able to devote more focus on other, more value-added tasks for the company. I'm currently only a team of 1 and the time that Fivetran saves is immeasurable. It just is a high quality product that does exactly what it says it does and does it reliably.”

ANDREW GARRETT  
OPERATIONS AND ANALYTICS MANAGER, CONTACTUALLY

“We get a lot of value out of Fivetran. Having all of our different data sources in our warehouse makes it easy for us to connect our various data sources to business intelligence tools and to execute ad hoc queries on the data. We especially like being able to join data from different data sources together. We use Fivetran every single day.”

WILL STANTON  
PRINCIPAL DATA SCIENTIST, VICTOROPS

“Fivetran is so easy. You put in your credentials, click save and you never think about it again. You don't have to manually modify and manipulate tables like you do with SSIS. I would need at least 1.5 additional full-time engineers to do what Fivetran does.”

JARED DUQUETTE  
ANALYTICS MANAGER AND ARCHITECT, PADNOS

“We really like what Fivetran enables us to do. It is incredibly easy, fast and reliable. This has been a paradigm shift for us — it is the future of data pipelines and ETL and Fivetran is at the forefront of it. In ten years, everyone will use Fivetran or a service like it. No one is going to build data pipelines themselves. It's a massive time and cost saver and a multiplier for the entire company. We don't just use the product, we're fans of the product.”

MARCUS LAANEN  
SENIOR MANAGER BUSINESS INTELLIGENCE, DOCUSIGN

#### ABOUT MATILLION

Matillion delivers technology that helps companies exploit their data using the Cloud. Matillion ETL is a disruptive, fast growing ETL/ELT tool, delivering structured and semi-structured data integration in the cloud. It is enterprise ready, yet 100x faster, easier to use, simpler to deploy and significantly cheaper than traditional ETL technology.

Total Customer References

[VIEW ALL REFERENCES](#)

## Featured Testimonials

“Every organization has diverse data needs and skill levels that require a strong data management strategy. Reducing complexity in the data integration process and increasing time to value for enterprise-wide insights are crucial components in this strategy. Matillion products enable enterprises of any size to perform data integration and data transformation, simply and efficiently, to use data effectively.”

VAMSHI GUNDA  
SENIOR MANAGER, DATA & ANALYTICS, WESTERN UNION

“Matillion provides enterprises with a cloud-native data transformation solution that eliminates the lengthy process of hand-coding and outpaces legacy ETL tools to help customers get more value from their data, quickly.”

DANIEL YU  
DIRECTOR OF PRODUCT MARKETING, MICROSOFT

“Snowflake and Matillion ETL together, have enabled every analyst across the organization with a common data platform rather than having to rely on individual system reporting capabilities and having to learn the nuances of each system.”

CHRISTOPHER JAMES  
DATA WAREHOUSE LEAD, DUO SECURITY

“Through the work we have done with Qrious and Matillion ETL for Amazon Redshift we are moving towards becoming a truly data-driven business, enabling us to ensure we are providing our subscribers with the best possible viewing experience and stay competitive with global content providers.”

HEMA PATEL  
GENERAL MANAGER, LIGHTBOX

#### ABOUT STITCH

# Stitch

A Talend Company

Stitch is an ETL service built for developers. It connects to tools like Salesforce and Facebook Ads, and consolidates that data into a central location where it's ready for analysis. Stitch evolved out of RJMetrics, a widely used business intelligence platform. Data consolidation was always central to the RJMetrics product, and the team repeatedly heard requests from customers looking for ETL as a standalone service.

# 149

## Total Customer References

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“We can customize and collaborate on our analyses, join across data sources, and produce reports that actually get used. Stitch makes all that possible.”

CHRIS HEXTON  
CO-FOUNDER, VERO

“By using Stitch, we were able to reduce the ETL lag from 6 hours to 5 minutes, and that allowed us to operationalize our data intraday. Now we can act on data sooner, and we have fewer discrepancies across tables from data not being equally up to date.”

ANDREW PAFITIS  
ANALYTICS MANAGER, PUPPYSPOD

“Stitch made it easy to integrate the data sources and get data in our database. Selecting Google Ads and the other integrations took just a couple of minutes.”

KARAN CHAUDHARY  
SENIOR MARKETING ANALYST, SPLASH MATH

“Stitch is a mature application and was very much capable of addressing our problems. It has integrations for a good number of SaaS platforms and databases and it also allows one to build custom integrations using the open source Singer platform. We built one for a CRM platform that we use, and the team at Stitch was very cooperative in deploying it to the ecosystem and promptly responded and effected any changes we made as they came up.”

JEFFERSON SANKARA  
SENIOR DATA SCIENTIST, LORI

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“StreamSets allows me to provide stable, sustainable data operations on top of both a self-service and professional platform and to operate this at scale.”

DAN JEAVONS  
GENERAL MANAGER OF DATA SCIENCE, SHELL

“We know for a fact that using StreamSets has resulted in the business asking us for more and more training to understand how technology works, building more pipelines, and having quicker outcomes that they're able to utilize to drive business results.”

DARREN DELSOL  
CLIENT LEAD, BT GROUP

“By moving to the cloud with StreamSets and by leveraging their big data ecosystem, we can finally use all of our data and break down the silos we've struggled with in the past.”

JEAN-MARIE BERTONCELLI  
BIG DATA AND ANALYTICS ARCHITECT, DELUXE

“With StreamSets we can easily take and use any file format [for the COVID pipeline]. When an agency wants to switch endpoints, they don't have to redo the whole pipeline. All they have to do is change the origin.”

SAGAR MANGAM  
AVAAP, STATE OF OHIO

### Featured Testimonials

“With Striim now on Snowflake Partner Connect, customers can start loading their data in minutes with one-click access to a proven and intuitive cloud-based data integration service.”

HARSHA KAPRE  
DIRECTOR OF PRODUCT MANAGEMENT, SNOWFLAKE

“Thanks to Striim we are accelerating our customer insights in Snowflake. Our legacy analytics platform used to take an hour per customer data load and weeks for each new deployment. With Striim we are able to transfer operational data to Snowflake in near realtime for all customers.”

PRASHANT SORAL  
CHIEF TECHNOLOGY OFFICER, INSPYRUS

“Striim gives us a single source of truth across domains and speeds our time to market delivering a cohesive experience across different systems.”

NEEL CHINTA  
IT MANAGER, MACY'S

“We chose Striim as it provides continuous access to the data in our MySQL database without impacting its performance, and without taking the data out of the Google Cloud environment.”

PAOLO GIANGIACOMO  
SYSTEMS INTEGRATION MANAGER, HOMESERVE

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“Adeptia had a great reputation for the comprehensive nature of their solution, their excellent training capabilities, and their supportive development team. We knew that if we ever hit a wall, we would be able to reach out to Adeptia and get the help we needed to move forward.”

ARUNO JOHNSON  
IT AND PROJECT MANAGEMENT, BACB

“Powered by Adeptia, our On-Demand Integration solution truly achieves the ability to integrate from anywhere to anywhere, pulling data from a customer site or receiving incoming data. We link small and large data transfers across the globe into a unified solution. With Adeptia, integration across applications in the cloud — as a true off-the-shelf service — has been realized.”

BOB SCARBOROUGH  
CEO, TENSOFT

“We found Adeptia Integration technology as a best fit for our strategy of centrally managing all our Multiple Listing Service (MLS) interfaces within one solution. Adeptia solution is attractively priced, is easy to manage and provides outstanding value.”

PEYMAN ALEAGHAX  
PRESIDENT, REALTYSOFT

“Adeptia is one of the few single platform complete integration vendors whose focus and offerings remain focused on integration.”

PETER MUELLER

#### ABOUT ALOOMA

# alooma

Alooma's cloud-based service makes data accessible, valuable and actionable in real-time. It enables Data Engineers and Data Scientists to integrate, clean, enrich and stream data from any source to any data warehouse or application.

12

Total Customer References

[VIEW ALL REFERENCES](#)

## Featured Testimonials

“Alooma gives Rover data visibility and ownership we never were able to achieve before. With Alooma's Event Stream, we are able to record events from web and mobile apps into a single place (our Redshift data warehouse) where people can analyze user behavior, for example, which we never had this level of visibility into.”

JAMES THIGPEN  
WEB & DATA OPS MANAGER, ROVER.COM

“We're now able to move every bit of data, no matter how big or small, or whatever the source or format, and we're doing it without errors and without having a team of people running around creating spreadsheets or writing scripts.”

BOB BRISKI  
DIRECTOR OF DATA INFRASTRUCTURE, INVOICE2GO

“Previously a developer would spend a few hours on average with most integrations, but now with Alooma, and only a few hours of training, we were able to teach a team of analysts to quickly integrate almost all sources.”

JAMES DRAPER  
DIRECTOR OF ANALYTICS, CHATBOOKS

“Alooma provides the flexibility we need: just the right balance between being able to automate changes with the click of a button.”

KATE WIGGIN  
VP OF BUSINESS OPERATIONS, QUID

### Featured Testimonials

“Outstanding features and flexibility for many ETL situations. It is an easy product to learn and the user interface provides excellent visibility at all stages of the ETL.”

BILL PREHL  
DIRECTOR OF IMPLEMENTATION SERVICES, K12

“The Centerprise product is very well suited for business analysts to easily manage and create custom workflows and models to automate complex data integration. The Astera products make extracting data from a PDF a simple and straight forward process, which makes ingestion and integration with other systems a breeze that simplifies workflows and complexity. Centerprise helps save significant development resources, expedite project timelines, and reduce project cost.”

JEFFREY WILSON  
APP DEV & SUPPORT ENGINEER III, CONDUENT

“Centerprise is a real easy and fast tool to get up and running. You can have a dataflow up and running in mere minutes compared to some other tools on the market. The interface is simple and pretty much everything is all in one place.”

DAWN BAUER  
SOFTWARE DEVELOPER II, FARMERS MUTUAL HAIL INSURANCE

“Centerprise is an 'all in one,' highly intuitive tool with a unified interface. It has given us speed, accuracy, and flexibility—features that those other solutions didn't give us.”

#### ABOUT HEVO DATA

Hevo is a no-code data pipeline platform that helps you integrate, clean, enrich, and bring together data from multiple data sources to any data warehouse such as Redshift, BigQuery, and Snowflake in real-time. The platform supports 100+ ready-to-use integrations across Databases, SaaS Applications, Cloud Storage, SDKs, and Streaming Services. Try Hevo for free and get your fully managed data pipelines up and running in just a few minutes.

### Featured Testimonials

“We were specifically looking for an ETL platform to replicate our data from MongoDB to Redshift for analytics. Our priorities were near real-time replication, reliability, maintainability, and Hevo ranked #1 in all these 3 aspects viz-a-viz other platforms that we tried. Two things we loved the most about Hevo is their first-class support and UX.”

ARTEMIY KOZYR  
SENIOR DATA ANALYST, WHEELY

“Hevo solved one of my core needs - getting complex data transformations done on the fly with ease. Quick integrations with complete flexibility and control makes Hevo a perfect complement to our data engineering team.”

SWATI SINGHI  
LEAD DATA ENGINEER, CUREFIT

“Hevo has helped us build data pipelines from various sources and transform data on the fly, without having to worry about API changes at the source. It even has the ability to schedule ETL jobs that support DAGs! All that coupled with amazing support makes Hevo a powerful tool that we depend on here at Fave and it has allowed us to move away from our in-house ETL tool.”

AIYAS ABOOBAKAR  
DATA ENGINEER, FAVE

“Hevo has simplified a lot of our tasks. We have scrapped our entire manual data integration process and switched to automation. We use Hevo's data pipeline scheduling, models, auto-mapping features to seamlessly move our data to the destination warehouse. We flatten certain columns from our incoming data using the Python interface in Hevo and our risk team uses Models to write SQL queries to get the required data for reporting.”

VIVEK SHARMA  
DATA ENGINEERING LEAD, SLICE

#### ABOUT PANOPLY

Panoply is an end to end data management platform for analytics on the cloud that automatically tailor fits itself towards your end needs and goals. Panoply automates data management from source to analysis, streamlining analysts' and data scientists' time to value. They optimize your time, granting up to 80% more efficiency by eliminating the time mired on complex labor of data preparation and management of unruly digital data and infrastructure.

45

Total Customer References

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“The integration took literally minutes, and presto! We got a fully automated data warehouse running over Redshift. Panoply enabled us to transform our production data into actionable insights instantly. Almost zero coding was required in order to pull the data and connect our BI tools.”

AMI GOLDENBERG  
CO-FOUNDER AND CTO, FAIRFLY

“We chose Panoply as opposed to a standard Amazon Redshift instance because we did not have a developer resource to start with and no way to maintain our own warehouse. Plus, Panoply handles the ETL process for our Mailchimp, advertising data in Google Sheets, S3 buckets, MongoDB and some of our 50+ social media accounts including Facebook and Twitter into a single location.”

AUDREN DE VALBRAY  
BUSINESS MANAGER, MOTORSPORT.COM

“With Panoply's data warehouse in place, we're getting more mature as a data-driven organization, allowing us to start lead scoring in order to ensure we're spending time on the best leads.”

BRIAN RITCHIE  
HEAD OF GROWTH, AGRIWEBB

“We've seen drastic improvements in query speed as well on Panoply. Looker visualizations are way more efficient and fast now that they have everything hosted with Panoply.”

DANIEL LEEB  
CO-FOUNDER & CHIEF PRODUCT OFFICER, SAUCEY

#### ABOUT SKYVIA

Skyvia is the universal cloud data platform for data integration, cloud to cloud backup with few clicks restore and data management. It is a no coding wizard-based solution that meets the needs of both IT professionals and business users with no technical skills. Skyvia supports the most popular cloud apps and on-premise data sources, including Salesforce, Dynamics CRM, QuickBooks Online, SQL Server, Amazon Redshift, Google BigQuery and many more.

\*\*\* 27

## Total Customer References

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“I think Skyvia is a great ETL tool, it makes maintaining my Salesforce data easy and it's an approachable way to replicate to MySQL.”

CHRISTOPHER LARGE  
TECHNICAL ACCOUNTING MANAGER, CIVICSOLAR, INC

“Skyvia really helped us get our infrastructure set up for reporting and analytics through their replication from Salesforce, Marketo and other platforms to our PostgreSQL instance. Their interface is easy to use and allows for easy selection of fields for replication from various objects. Their support and customer service is great too!”

KENTON COZART  
DATA SCIENTIST, PAX8, INC.

“I like that Skyvia solves integration between cloud base applications at an affordable price and with solid technical support.”

RODRIGO FRITIS  
MANAGING MEMBER, NISO, LLC

“The first requirement was an inexpensive easy-to-use solution with the ability to pull data from the Quickbooks Online API. The real value is that Skyvia meets the needs and does the work for a low bill. The interface is easy and "business-friendly".”

DOUG MOSHER  
TECHNOLOGY MANAGER, UNITED HOME EXPERTS

### TRUSTED BY

#### ABOUT XPLENTY

Xplenty is a data integration platform that requires no coding or deployment. Xplenty Big Data processing cloud service brings immediate results to the entire organization: from designing dataflows to scheduling jobs, Xplenty can process both structured and unstructured data and integrates with a variety of sources, including SQL data stores, NoSQL databases and cloud storage services. Read and process data from relational databases such as Oracle, Microsoft SQL Server, Amazon RDS, PostgreSQL, NoSQL data stores such as MongoDB, cloud storage file sources such as Amazon S3, and many more. Xplenty also allows you to connect with online analytical data stores such as AWS Redshift and Google BigQuery.

48

Total Customer References

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“At first we tried building our own ETL pipeline, then we evaluated 5 other ETL vendors - and Xplenty was by far the most reliable, affordable, and easy to use.”

FEDERICO NUSYMOWICZ  
SOFTWARE ENGINEER, POCKETZWORLD

“We are currently using Xplenty for many of our ETL needs ingesting Google Adwords and Analytics, Facebook and Bing, among others, into our Redshift Data Warehouse. What sold us on Xplenty was your ability to keep the API's updated and in sync. We don't have to keep updating things on our end every time Google makes a change. The pipe doesn't break when using Xplenty.”

MATTHEW GREGER  
DIRECTOR OF TECHNOLOGY, DIRAY MEDIA

“Xplenty's user interface was by far better than anything else I'd seen as an ETL solution. Just an intuitive drag and drop. Nothing to install. Once the data pipeline is created, it's simple. Xplenty has simplified the task of moving data or transforming data from one set to another set.”

RAYMOND MATOS  
DIRECTOR OF AD TECHNOLOGY, MEDIALETS

“Xplenty automates pulling together our data, whether on-prem or in the cloud, into a central location. It has allowed us to leverage new analytical tools to understand our business better and to eliminate a lot of manual, time consuming reporting.”

FRENCH WILLIAMS  
IT MANAGER, ROYALTECH

#### ABOUT Etleap

# etleap

Etleap is an ETL solution for creating perfect data pipelines from day one. Unlike other enterprise solutions, Etleap doesn't require extensive engineering work to set up, maintain, and scale. It automates most ETL setup and maintenance work, and simplifies the rest into 10-minute tasks that analysts can own.

11

Total Customer References

[VIEW ALL REFERENCES](#)

## Featured Testimonials

“Etleap is robust. Its agility with semi-structured data and JSON allows for a much more patient-centric approach.”

ABHINANDAN BHATTACHARJEE  
SENIOR DATA ENGINEER, ZAVA

“Why spend time building pipelines from scratch when a vendor like Etleap can do it for us, more effectively than we can do it on our own?”

ALAIN KRAMAR  
SENIOR SOFTWARE ENGINEER, INVOICE2GO

“With Etleap, we're able to do the ETL end-to-end and get it directly into the hands of whoever's trying to use it right away.”

BEN FISCHER  
DIRECTOR OF BUSINESS INTELLIGENCE, AXS

“One of the main selling points for us was that Etleap was a fully managed service. We didn't have to maintain any custom hardware or services ourselves.”

THOMAS DZIEDZIC  
DATA ENGINEERING AND SPECIAL PROJECTS, PAGERDUTY

## TRUSTED BY

#### ABOUT ETLWORKS

Etlworks is a modern ETL tool built for the cloud. It is also a full-fledged Enterprise Service Bus (ESB), so you can create your own APIs to extract and enrich the data from multiple, disparate sources, as well as submit and transform and then store this data in any supported destination, from the relational databases to cloud storage and APIs.

## Total Customer References

[VIEW ALL REFERENCES](#)

### Featured Testimonials

“With Integrator we've covered all our ETL needs seamlessly and in less time than initially planned thanks to Etlworks' continuous and amazing support. We started with one single use case and were surprised with how powerful and flexible, yet easy to use, the tool is, but now we find new uses for it every day.”

PABLO RODRIGUEZ  
TECHNICAL OPERATIONS MANAGER, KYERO

“In searching for a cloud based ETL tool on behalf of a client, we looked at Matillion, FiveTran, Azure Data Factory, Talend and more. Etlworks gave the best value with the right mix of features, versatility, pricing and most importantly their best-in-class, cordial and superlative support, as we found implementing it from a PoC to Production loading billions of records in few weeks of signing up. Any company looking to move to cloud quickly, on a tight budget, does not have technical resources on staff, would benefit from Etlworks offerings.”

BHAVIN GORADIA  
PRESIDENT, SPECTRUM E-SOLUTIONS

“Etlworks gives us the possibility to connect and exchange data from difference sources, without any coding effort. As a business, this makes you more agile and flexible. The software works very stable and if there are any unclarities, the Etlworks team is always fast in responding to any questions we might have. Issues are mostly solved within 24 hours.”

WOUTER ROSENKAMP  
DIRECTOR MARKETING & STRATEGY, PROPYLON

“Etlworks is a very intuitive and powerful platform to achieve data integrations. The possibilities are basically endless. From integrations with API's to integrations with relational databases. The Etlworks team is also very flexible in offering support and listening to feature requests. If some functionality is not there, they will create it for the customer. Overall, Etlworks speeds up implementations of data integrations, reduces development time and improves the quality of data.”

FRANCK VAN DER SLUIS  
DATA MANAGER, OPENCLAIMS
