## Financial Close Management Software Category

Financial close management (FCM) software is also called accounting close software. It helps companies to complete the financial close process. Many enterprises do financial close at the end of every month to keep their books accurate and successfully complete transactions. During this process, they execute tasks such as lead importing, expense approval, and bill delivery and payment.

FCM software offers functionalities such as reconciliation management, individual task assignment, and databases of previous accounting close data categorized by transaction type and month. Your accounting team can track individual deadlines and progress for each period throughout the cycle. FCM platforms integrate with accounting solutions and spreadsheets to help you document pertinent data and spot inconsistencies or noteworthy findings. They also offer corporate performance management functionalities such as forecasting, budgeting, and financial consolidation.

#### ABOUT RECONART

Frustrated with legacy reconciliation software, ReconArt was conceived to develop and bring to market a solution to address the inadequacies of software products that have been available for several years in an often stagnant market. ### Featured Testimonials

“ReconArt™ gives us faith in the financial numbers we report by delivering accuracy, reduced operational risk and a fully auditable environment. An important added value is that it paid for itself almost immediately through significant cost savings of tasks that would otherwise have had to have been done manually.”

“ReconArt™ offered excellent value and immediate return on investment. ReconArt as a partner demonstrated a clear and concise understanding of transaction matching. The modern design of the ReconArt™ solution means business users can configure new processes including data mapping and match rules with no more than Excel skills. This extreme ease-of-use makes ReconArt™ “revolutionary in the field of automating reconciliations” without IT involvement.”

DIANE CHAIDEZ  
CONTROLLER, FIESTA INSURANCE FRANCHISE CORPORATION

“Ease of use was a big reason why we selected ReconArt™.
