

Data Governance Software Category

Data Governance Software Category

Data Governance includes both organizational policies and processes that are related to the management of data. Data governance ensures that a company's data is accurate, audited, managed, secured, and documented (in terms of which data the organization holds). And, a data governance program is a set of policies and processes that help organizations manage data.

Data governance software can lead to a decrease in data management costs, improvements in data quality, and better access to all data for the stakeholders. For example, a good data governance program defines a company's master data model (i.e. a clear definition of customers, products, etc.), details the data retention policies, and delineates who will be assuming the roles and responsibilities of data authoring, curation, and access.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- Customer reference rating score
- Year-over-year change in amount of customer references on FeaturedCustomers platform
- Total # of profile views on FeaturedCustomers platform
- Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- Social media followers including LinkedIn, Twitter, & Facebook
- Vendor momentum based on web traffic and search trends
- Organic SEO key term rankings
- Company presence including # of press mentions

COMPANY SCORE

- Total # of employees (based on social media and public resources)
- Year-over-year change in # of employees over past 12 months
- Glassdoor ranking
- Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT ALATION

Alation is the first data catalog built for collaboration. With Alation, analysts are empowered to search, query and collaborate on their data to achieve faster, more accurate insights. Alation automatically captures the rich context of enterprise data, including what the data describes, who has used it, and the fit between the data and different types of analysis. Alation's catalog is generated and updated using machine learning and improved through human collaboration between analysts, stewards, experts and business users.

Featured Testimonials

“I'm using Alation to document all our data sources. I love profiling, automated metadata extraction, and the ability to get usage stats from the query log.”

 RYAN MASON
DATA SCIENTIST, SQUARE

“Alation helps us with our governance audits. It holds our policies, procedures, and data flow diagrams via lineage.”

 AMBER O'CONNELL
DIRECTOR OF DATA GOVERNANCE, STATE OF TENNESSEE

“Data is at the core of running our business and Alation is at the center of our data ecosystem. By empowering our teams with knowledge about our data, we are lowering the barrier for generating insights, and can provide a better customer experience. We chose Alation because it allows for controlled visibility and access into trusted data, and a next-gen approach to data management at the point of consumption so that the right data is used by the right people.”

 SEBASTIAN LAROSA
DIRECTOR OF DATA PLATFORMS, VICE PRESIDENT, FIFTH THIRD BANK

“Users can search for and discover data, and ensure that data is properly governed and used in a compliant manner.”

 HELEN HUNTER
CHIEF DATA AND ANALYTICS OFFICER, SAINSBURY'S

ABOUT ATLAN

atlan

Atlan is a modern data collaboration workspace (like Github for engineering or Figma for design). By acting as a virtual hub for data assets ranging from tables and dashboards to models & code, Atlan enables teams to create a single source of truth for all their data assets, and collaborate across the modern data stack through deep integrations with tools like Slack, BI tools, data science tools and more.

Featured Testimonials

“Atlan is a great product and one that we would definitely recommend! Compared to other products in the marketplace, the combination of features, a pay as you go pricing model, and access to the product team is unmatched.”

VICTOR WILSON
DATA ARCHITECT, SCRIPPS HEALTH

“We evaluated all the open source solutions out there. Each one of them has a niche, but none of them gave me the comprehensive data portal — data discovery, quality, lineage and governance — that I was looking for.”

VENKAT GOPALAN
CHIEF TECHNOLOGY, DATA & DIGITAL OFFICER, BELCORP

“My initial impression was the user interface and the thought put into every element — making it searchable, easy to navigate. When you have thought through small things like icons, it paints a good picture.”

MEHUL PATEL
ENGINEERING MANAGER, CHARGEPOINT

“If you are starting your data governance journey, Atlan is the tool and team to partner with to help you achieve your goals.”

MANISH KUMAR
HEAD OF DATA MANAGEMENT & ENGINEERING, FUNDING SOCIETIES

ABOUT COLLIBRA

Collibra is the Data Intelligence company. They accelerate trusted business outcomes by connecting the right data, insights, and algorithms to all Data Citizens. Their cloud-based platform connects IT and the business to build a data-driven culture for the digital enterprise. Global organizations choose Collibra to unlock the value of their data and turn it into a strategic, competitive asset.

Featured Testimonials

“The integration of Collibra with our business intelligence and other tools has helped us foster understanding in our organization by bringing data governance to our users. We are excited about the next phase of our data governance journey and see many more possibilities ahead.”

RYAN COOK
SENIOR BUSINESS INTELLIGENCE DEVELOPER, ADOBE

“The real key for us in selecting Collibra was the proof of concept. Collibra put skin in the game and quickly helped us prove out the value of data governance. That really sealed it for us.”

RONALD LAYNE
DIRECTOR, DATA MANAGEMENT, GEORGE WASHINGTON UNIVERSITY

“Data users can now get an integrated business view of their technical metadata, data quality, data movement controls, and all business metadata in a single central universal platform.”

VIKRAM CHOPRA
SENIOR MANAGER, SINGLE-FAMILY, DATA & DECISIONS, FREDDIE MAC

“Collibra has played an important role in our journey to build data transparency within our organization. It helps our users connect the dots and support our desired self-service model, eliminating the need for a middleman and allowing them to focus on their real work.”

ASHISH HARURAY
SENIOR CENTER OF EXCELLENCE LEAD, DATA GOVERNANCE, AXA XL

ABOUT IMMUTA

Immuta was founded in 2014 based on a mission within the U.S. Intelligence Community to build a platform that accelerates self-service access and control of sensitive data. Immuta's award-winning automated data governance software platform creates trust across security, legal, compliance, and business teams so they can work together to ensure timely access to critical business data with minimal risks. Its automated, scalable, no code approach makes it easy for users to access the data they need, when they need it, while protecting sensitive data and ensuring their customers' privacy.

[VIEW ALL REFERENCES](#)

Featured Testimonials

“Immuta is the go-to technology to implement our vision of an internal “Data & Analytics Marketplace”, enabling full transparency on the relevant data assets with secure and compliant data access.”

WALID MEHANNA
HEAD OF DATA & ANALYTICS, DAIMLER

“By incorporating Immuta's automated governance and privacy capabilities, we have enhanced our overall strength and security of the platform.”

STEVEN PETREVSKI
SENIOR VICE PRESIDENT & GENERAL MANAGER, AON

“As we add more components in a cloud database environment, it's much cleaner than any sort of on-prem situation we've had before. The ability for us to manage access controls, deploy privacy enhancing technologies, and rapidly implement novel frameworks of governance for our research teams has been a breath of fresh air, with no management or overhead costs for adding additional cloud database solutions.”

RYAN NAUGHTON
FOUNDER & CTO, THE CENTER FOR NEW DATA

“Migrating IT systems to the cloud can be complex. Immuta simplifies this process and helps protect organizations during their journey to the cloud.”

ABOUT NETWRIX

Netwrix Corporation is the #1 provider of change and configuration auditing software, offering the most simple, efficient and affordable IT infrastructure auditing solutions with the broadest coverage of audited systems and applications available today. Founded in 2006, Netwrix has grown to offer products that are used by more than a hundred thousand of companies worldwide, and is ranked in the Top 100 US software companies in the 2013 Inc. 5000 and Deloitte Technology Fast 500.

Featured Testimonials

“It is a relief to have a product that provides such a holistic view across the environment. We have unstructured data everywhere — SharePoint, OneDrive for Business, Nutanix Files — and the Netwrix platform monitors all of it. You cannot do that manually. As a security guy who is responsible for compliance and security of the entire organization, I can state that the Netwrix solutions are invaluable and make my job much easier.”

CHRIS EDWARDS
ENTERPRISE ARCHITECT & SECURITY MANAGER, CISSP, CITY OF PLANO

“Netwrix products are solid and easy to configure out. Moreover, with Netwrix daily reports I have been able to detect the problems in the early stage and sustain security, avoid downtime and data breaches.”

JON DOBSON
NETWORK ADMINISTRATOR, THE DONOHOE COMPANIES, INC.

“Netwrix All-in-One Suite integrates a lot of useful solutions that are easy to configure and use, and has a serious price advantage.”

SAVAS DEMIR
INFRASTRUCTURE MANAGER, EUROBANK TEKFEN

“Netwrix Auditor has been a great tool for monitoring and auditing various aspects of our network. The software was easy to install and intuitive to use. The daily and real-time automated reports we receive are beneficial and save us a great deal of time. Since installing Netwrix Auditor, we are more informed than we have ever been about key security events happening across our network. The technical support is fantastic, and the product itself is constantly evolving to increase functionality and value.”

DEAN SMITH
MANAGER / INFORMATION TECHNOLOGY, CANADIAN DENTAL ASSOCIATION

ABOUT ERWIN

erwin, Inc. provides the only unified software platform combining data governance, enterprise architecture, business process and data modeling. Delivered as a SaaS solution, these technologies work together to unlock data as a strategic asset so all enterprise stakeholders can discover, understand, govern and socialize data to mitigate risk, improve organizational performance, and accelerate growth.

Featured Testimonials

“ We selected erwin as our data governance partner because of their solution’s comprehensive metadata management, data harvesting and automated data lineage capabilities. What that means is that E.ON will be able to serve the right data to the right people according to their roles and responsibilities, with confidence in its quality. Then they can use it to make better, faster decisions that ultimately improve our performance as an energy company. ”

 ROMINA MEDICI
DATA MANAGER, E.ON

“ I love that you can import from other databases and have the model built automatically. You don’t have to model from scratch with erwin. We use reverse engineering to obtain the model of the tables in order to understand what data will be fed from other systems or applications. ”

 KEVIN TERRY
WEB INFORMATION MANAGER, CA TECHNOLOGIES

“ We selected the erwin data intelligence software because of its comprehensive metadata management capabilities and its ability to seamlessly integrate definitions from multiple solutions including business glossaries, data models and multiple sources, providing us data lineage and impact analysis across the business. ”

 DUANE EVANS-PARKER
DATA AND ANALYTICS DOMAIN MANAGER, NEW ZEALAND POST

“ Many data governance tools aren’t as automated as expected, and you end up purchasing multiple tools to accomplish your program goals. The erwin Data Intelligence Suite is a consolidated solution. It includes a variety of features and, most important, offers an easily understandable dashboard, which is extremely valuable for business users. The fact that data mappings and lineage can be scheduled to run in a batch, and that you can generate all report mappings with erwin Smart Data Connectors versus having to run them manually, one at a time, is a significant benefit. ”

ABOUT PKWARE

PKWARE offers the only data discovery and protection solution that locates and secures sensitive data to minimize organizational risks and costs, regardless of device or environment. Their ultra-efficient, scalable software is simple to use on a broad range of data types and repositories, enabling precise, automated visibility and control of personal data, even in the fastest-moving, most complex IT environments. With more than 1,200 customers, including many of the world's largest financial institutions, retailers, healthcare organizations, and government agencies, PKWARE continues to innovate as an award-winning global leader in data discovery, security, and compliance.

Featured Testimonials

“Script-based masking has been very challenging in terms of running scripts, validations and access grants to the stakeholders. With PKWARE, there is no risk as the governance process is tightly coupled with the tool.”

KANGANALAPATTI JANARTHANAN JAYANTHI
IT MANAGER, GREAT EASTERN ASSURANCE

“Most prospective customers we meet initially do not consider where they might hold undetected sensitive data. Others believe they've already thoroughly scrubbed and secured all their sensitive data. We use PKWARE first as a proof point, manage a sample migration of representative data onto AWS, then detect and report the locations of their exposed sensitive data. Establishing this trust leads to a larger project with wholesale migration of data to AWS. PKWARE is instrumental in securing new revenue clients, managing and adding on Big Data services.”

MEENAKSHI KUMAR
DIRECTOR SERVICE DELIVERY, MIRI INFOTECH

“PKWARE'S data security platform provides a simple way to create and manage policies, gain visibility into where files are located, and protect sensitive information while avoiding user disruption and broken workflows.”

DAN SCHULMAN
CHIEF TECHNOLOGY OFFICER, MISSION CYBER

“The level of customer obsession and interest in making the solution scale was the reason we were jointly successful. I would recommend working with PKWARE.”

ABOUT SAVIYNT

Saviynt is a leading provider of Cloud Security and Identity Governance solutions. Saviynt enables enterprises to secure applications, data, and infrastructure in a single platform for Cloud (AWS, Azure, Box, Dropbox, Hadoop, Office 365, Salesforce, Workday) and Enterprise (Cerner, Dynamics, Epic, Oracle EBS, SAP). Saviynt is pioneering IGA 2.0 by integrating advanced risk analytics and intelligence with fine-grained privilege management.

Featured Testimonials

“We had to do something quite impressive to get more in the modern age and fit for the digital transformation that BP is going through. When we looked at products, we chose native cloud to make logical choices for our way forward. Saviynt fits very nicely into that.”

DAFYDD HUGHES
DIRECTOR, BP

“Before, when we didn't have a modern solution, we felt stagnant. Today, we're in a much better place. Overall, the implementation has been a success, and the Saviynt team was fantastic.”

PAUL DUMBLETON
ENTERPRISE INFORMATION SECURITY TEAM MANAGER, GORDON FOOD SERVICE

“Saviynt was the only product in the market that provided a comprehensive security solution for SAP HANA. The security controls framework and analytics platform, provided out-of-the-box, has improved our ability to effectively manage risk and significantly increased efficiency, e.g. our SOX control owners can now finish, what once was a two month effort of data collection and preparation for certification, in just a few hours.”

SENIOR MANAGER
KLA-TENCOR

“Partners HealthCare is committed to providing the highest level of security for its EHR systems, and Saviynt has proven that its platform meets our strict requirements, and offers compatibility with existing identity management infrastructure.”

ABOUT SEMARCHY

Semarchy is the Intelligent Data Hub™ company. Its xDM platform solves enterprise Master Data Management (MDM), Application Data Management (ADM), and Collaborative Data Governance challenges at some of the most well-known brands across the US and Europe. This agile platform leverages smart algorithms and material design to simplify data stewardship, quality, enrichment, and workflows. Organizations use the xDM platform to address challenges such as The Global Data Protection Regulation (GDPR). xDM from Semarchy is implemented via an agile and iterative approach that delivers business value almost immediately and scales to meet enterprise complexity.

Featured Testimonials

“Thanks to the data delivered by the data hub, we have also been able to set up a maturity grid with validation of the data quality measures by the business, as well as business processes to support quality improvement. The division managers come to the Data Hub to maintain the quality of their data. All of our divisions are involved to define the quality measures, which are managed by a full-time analyst, and to define action plans.”

ÉRIC JACOUPY
BUSINESS TECHNICAL DATA ANALYST, ZODIAC AEROSPACE

“The Data Hub greatly simplifies business data cross-analysis. In a second step, it should make it possible to guarantee data quality consistency within our subsidiaries’s systems and support the achievement marketing and sales targets. Finally, the hub opens new perspectives for higher service quality and greater added value for the group.”

DENIS LAPIERRE
DEPUTY MANAGING DIRECTOR, APRIL TECHNOLOGIES

“We have been impressed to see, during the proof of concept, Semarchy seamlessly integrate with our existing processes and display its data management and consolidation capabilities on top of our own public data in a very short time frame. We believe in Semarchy’s capabilities to execute on our project.”

FRANK SIMON
CIO, ARAYMOND

“I think they are now starting to realize the benefit of us providing them a single feed of product catalog data. They can clearly see value in terms of the lack of integration work and data issues they will have to solve as part of their project. Thanks to Semarchy, they have been able to rely on us to solve those issues for them.”

ABOUT TALEND

talend

At Talend, their mission is to connect the data-driven enterprise so customers can operate in real-time with new insight about customers, markets and business. Founded in 2006, Talend's global team of integration experts builds on open source innovation to create enterprise-ready solutions that help unlock business value more quickly. By design, Talend's integration software simplifies the development process, reduces the learning curve, and decreases total cost of ownership with a unified, open, and predictable platform.

Featured Testimonials

“Talend Metadata Management has helped us implement data governance with data stewards and data owners to document data and processes. Air France-KLM can locate customer data, determine its origin and destination and share the information within the company ten times faster than before.”

DAMIEN TRINITÉ
CRM BIG DATA PROJECT MANAGER, AIR FRANCE KLM

“As a financial technology company, we have particular needs for data governance due to the nature of the data we hold. Talend is pivotal in helping us stay compliant and develop new customer services.”

ELIE SOUKAYEM
DIRECTOR OF DATA ANALYTICS, AREEBA

“The ‘Data for Business’ project is giving back data to the business, with free and governed access thanks to Talend Cloud.”

ARNAUD MATON
DATA MANAGEMENT MANAGER, IT GROUP, KILOUTOU

“Since each division operated independently, it was important to make each division responsible for governing its own data. A major correction project was initiated, based on exchanges with each division. The IT department used Talend Data Quality at this stage to ensure the relevance of the data deduplication, error detection, data formatting, etc. The fact that these exchanges were structured with Talend MDM gives us traceability today that allows us—in case of error—to immediately determine its origin and thus how to rectify it.”

ABOUT DATAEDO

Dataedo is a team of software and database developers with 15+ years of experience with SQL Server and Oracle database design, development & maintenance. They worked with transactional systems, ERP/CRM, web applications and data warehouses, both third party and their own. In many projects in which they participated, they lacked proper documentation, communication and effective transfer of knowledge which led them to development of Dataedo the tool they were always missing.

Featured Testimonials

“Dataedo is a fantastic value. We jump started all of our Data Governance efforts using the tool. We documented key databases quickly and easily and published the information to our analyst community. The Dataedo team is dream to work with and very responsive.”

SANDRA RECCA
SR. DIRECTOR, FITCH RATINGS

“Dataedo is a tool that is fast and simple to use. Easy structure and search tool helps developers to find descriptions for documented data very quickly. We update documentation with every release so seeing a documentation progress is really helpful. I would recommend Dataedo, as it has all the features which we need for documenting our databases. If we have another project in the future it is highly probable that we would use this tool as well.”

MICHAL RYSAVY
APPLICATION/DATABASE DEVELOPER, ACCURO HEALTH INSURANCE

“I am now using Dataedo to help support my client's Data Governance program and make life much better for their BI team. I'll continue to promote this product with future clients as I feel strongly that it is an excellent solution, the best I've seen in its price category.”

TED CLARK
LEAD CONSULTANT, IMPACTMAKERS

“Dataedo is an easy to use facility for managing basic metadata centrally and producing enhanced data dictionaries. Initially we wanted to use it for a single set of system documentation, but we will now employ it for scheduled metadata updates along with multi-user maintenance. The well-structured database repository has also facilitated a Data Lineage project. I would recommend Dataedo to anyone with similar requirements, and in fact already have.”
