

Energy Management Software Category

Energy Management Software Category

Energy management software monitors and reports energy system utilization, reducing energy costs for companies. The platform includes features such as sustainability and carbon reporting, HVAC systems controls, energy data analytics, and real-time energy use tracking. It offers functions that improve energy utilization to minimize carbon emissions and promote efficient consumption.

Energy management software has common features with sustainability management tools. Both applications can be used in tandem and integrated with IoT-linked sensors that track energy use in real time. Energy management software monitors energy consumption from several sources and actively engages with energy-consuming platforms by changing energy use. It generates auditable energy usage reports and offers data analytics features to digest information related to energy consumption.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ▢ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ▢ Customer reference rating score
- ▢ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ▢ Total # of profile views on FeaturedCustomers platform
- ▢ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ▢ Social media followers including LinkedIn, Twitter, & Facebook
- ▢ Vendor momentum based on web traffic and search trends
- ▢ Organic SEO key term rankings
- ▢ Company presence including # of press mentions

COMPANY SCORE

- ▢ Total # of employees (based on social media and public resources)
- ▢ Year-over-year change in # of employees over past 12 months
- ▢ Glassdoor ranking
- ▢ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT AMERESCO

Ameresco, Inc. (NYSE: AMRC) is an independent, integrated, comprehensive energy efficiency and renewable energy company that is building a sustainable future with public organizations and private enterprise throughout North America and the United Kingdom. Through energy audits, innovative engineering, utility-scale solar farms and deep energy retrofits, Ameresco applies forward-thinking technology to the challenges of controlling emissions, enhancing energy security and shifting toward clean, renewable sources of power.

Featured Testimonials

“Ameresco made it easy for us to evaluate our purchasing options and understand the complexities of the energy market, resulting in measurable year over year savings across Red Robin’s national energy footprint.”

AMANDA MCALLISTER
DIRECTOR OF CAPITAL PURCHASING, RED ROBIN

“Ameresco’s expertise has allowed us to continue to build on this record of energy efficiency as we work to identify areas in which we can lower electricity costs and reduce expenses for the City and our customers.”

DENNIS LILLEY
AUSTIN ENERGY

“Partnering with Ameresco was a smart decision for Buns Ranch because we needed someone that understood how we operate and has the skills to design a system that would work out here. We no longer worry about our water supply. Having confidence in our system goes hand-in-hand with confidence in Ameresco. We know that the pump will draw water for the ranch and our storage tank without requiring supervision from our team. This allows us to focus on our guests and the animals: the sun shines and takes care of the rest.”

KYLE BURTS
BURTS RANCH

“The professionalism of the Ameresco staff and team members was exceptional—the knowledge, expertise, and can do attitudes spoke volumes about Ameresco’s commitment to excellence. The GCCC and City of Santa Fe COSF were pleased with the outcome and look forward to partnering with Ameresco on future projects.”

ABOUT ATRIUS BUILDING INSIGHTS

Atrius builds cutting-edge, comprehensive solutions to enhance how buildings, businesses, and people interact. As part of the Intelligent Spaces Group at Acuity Brands, they share a mission to reshape how people operate, work in, and experiences spaces.

Featured Testimonials

“Partnering with [Atrius Building Insights] has allowed us to get our clients closer to their data. [Atrius Building Insights] has streamlined our internal energy analysis offering and provides a fantastic, customizable reporting tool.”

NICK PROCTOR
FOUNDER & CEO, AMBER ENERGY

“We’re using [Atrius Building Insights] cloud based system to help us manage and leverage our teams and our remote location sites from the U.S. We’re leveraging the real-time energy visibility, analytics, and graphing that [Atrius Building Insights] provides to start getting a lot more use out of our energy data.”

JOAQUIN SERRANO
SUSTAINABILITY MANAGER, AVERY DENNISON

“With [Atrius Building Insights], I have easy access to building and energy data, allowing me to dive into identifying energy savings for a customer quickly.”

DUANE KUBISCHTA
SENIOR ENERGY ENGINEER, KW ENGINEERING

“[Atrius Building Insights] provides a technical foundation for our greenhouse gas reduction strategy by enabling an organized energy management process and informing our selection of commissioning and retrofit projects.”

JOHN ELLIOTT
CHIEF SUSTAINABILITY OFFICER, LAWRENCE BERKELEY NATIONAL LABORATORY

[VIEW ALL REFERENCES](#)

Featured Testimonials

“The installation was complete in two days and we were able to stay up and running throughout the entire process.”

CLAIRE GILLIES
PRESIDENT, THE SOURCE

“GridPoint's data-driven products play an essential role in our ability to affect our environmental impact across our restaurants nationally. The financial benefits we see continue to grow as we deploy the solution throughout our enterprise and is an exceptional by-product of working with partners like GridPoint.”

CAROLYN ANDERSON
EXECUTIVE DIRECTOR, CHIPOTLE MEXICAN GRILL

“If you increase sales by a dollar, only a small portion goes to the bottom line. When you save a dollar it goes directly to the bottom line.”

RAUL DOMINGUEZ
OWNER, WENDY'S

“Hypothetical models are great, but possessing real data to prove our theories to customers reinforces our recommendations and has the potential to bring additional savings because of the continuous submetering. GridPoint's granular, undeniable data is the critical link we were missing to accurately provide performance optimization, capacity planning and regulatory compliance in a variety of industries.”

ABOUT ICONICS

Founded in 1986, ICONICS is an award-winning global software provider offering real-time visualization, HMI/SCADA, energy management, fault detection, manufacturing intelligence, MES, and a suite of analytics solutions for operational excellence. ICONICS solutions are installed in 70 percent of the Global 500 companies around the world, helping customers to be more profitable, agile and efficient, to improve quality, and to be more sustainable. ICONICS is leading the way in cloud-based solutions with its HMI/SCADA, analytics, mobile, and data historian to help its customers embrace the Internet of Things (IoT). ICONICS products are used in manufacturing, building automation, oil and gas, renewable energy, utilities, water and wastewater, pharmaceuticals, automotive, and many other industries. ICONICS' advanced visualization, productivity, and sustainability solutions are built ...

Featured Testimonials

“Continental selected ICONICS automation software solutions due to the company's product scope, in terms of technical solutions, and the flexibility of its available modules. Continental favored ICONICS' strong customer orientation, the flexibility and availability of its employees, and the fact that they were solution-oriented.”

SEBASTIAN AMLONG
PROJECT LEAD, DOPAC, CONTINENTAL AG

“Users are really impressed with the trend and alarm analysis capabilities. Web capabilities are the same as SCADA system capabilities, too. The product is completely built on OPC standards, making integration with other OPC products simple.”

FACILITIES ENGINEER
LIIEC OIL COMPANY

“The use of ICONICS software to calculate excessive fuel consumption, coupled with its presentation of current engineering and economical performance analyses (technical process rates) allows us to identify and determine the reserves of increasing a thermal power plant's efficiency. In the final analysis, this allows thermal power plant owners to optimize their production capacity in order to be competitive in the electricity market, as well as increase energy company profits in general.”

GLOBAL ENERGY GENERATION FIRM

“This transition helps us towards energy efficiency. Digital tools allow us to connect objects, such as gas or electricity meters, in order to follow, in real time, our consumption and to alert company personnel at all levels. ICONICS is a Microsoft partner and this relationship has allowed us to install a solution for our energy management that is sustainable and scalable. This energy metering project, and in particular the installation of ICONICS software, has allowed us to create energy key performance indicators, that are published at each level of the company with needed information.”

Featured Testimonials

“We wanted a building that would use only renewable energy and that would learn to optimize its energy usage to minimize emissions. That was achieved by combining Schneider's EcoStruxure building management system with Microgrid Advisor.”

KALLE HINTIKKA
PROJECT MANAGER, LIDL FINLAND

“Throughout this process, we have discovered that Schneider Electric shares the same values as we do: renewable energies, optimization of existing infrastructure, and sustainability.”

KNUT MOLAUG
CHIEF EXECUTIVE OFFICER, GREEN MOUNTAIN AS

“We have averaged 3% savings per year through energy procurement and cost avoidance. With those savings we can invest in additional amenities to make the guest experience exceptional.”

THOMAS WEBSTER
DIRECTOR OF STRATEGIC SOURCING, HILTON WORLDWIDE

“Schneider Electric delivers 24/7 monitoring, avoided unnecessary manual checks and extended service bureau support which has been instrumental in optimizing operational efficiency and time.”

ABOUT URJANET

urjanet

Urjanet is the global leader in utility data aggregation. Their technology collects, processes, and delivers data from over 4,000 electric, natural gas, water, waste, telecom, and cable utilities worldwide. The data they provide can be configured and integrated into any application to support your exact utility data needs.

Featured Testimonials

“We chose the Urjanet-EnterScope solution because its intuitive interface shows us the per-minute energy costs of our air compressors, boilers, and HVAC equipment all in one place. It also provides the cost of water for individual cooling towers and office operations. This level of detail gives us insights into how much it costs to make our products in different regions around the world and how we can improve facility operations.”

RANDY WILLIAMSON
EHS & ENERGY SPECIALIST, MUBEA

“The insights we can glean from interval smart meter data are essential for virtually all energy management and operational efficiency efforts. Getting data directly from utilities is anything but simple or easy. We are excited to be an Urjanet partner and to leverage their expertise and technology in solving all tiers of utility data access.”

VLADI SHUNTUROV
PRESIDENT & CTO, LUCID

“Given everything that it covers, it's a very cost-competitive service that Urjanet offers. Urjanet provides both whole building interval data and utility invoice data from more than 5,000 utilities worldwide. Its longstanding industry leadership also came highly recommended by Arconic's energy efficiency consultant.”

STEVE FRANK
ENERGY SOURCING MANAGER, ARCONIC

“The Urjanet utility data solution has far exceeded our customers' expectations. Our customers rave about how easy our software is to use with Urjanet data. What some of our customers used to do in weeks now only takes them a few days.”

ABOUT WATTICS

Wattics is an enterprise cloud energy management and analytics software used by growing teams of energy service companies, green building professionals, energy consultants & analysts to manage bulk utility/IoTs/sub-meter data to spot business energy inefficiencies, increase sustainability, improve indoor air quality and reduce CO2 emissions in industrial and commercial buildings. Wattics has a global presence through its partner network spread across more 52 countries around the world.

Featured Testimonials

“Highly recommended! We could cut 80-90% of the time our energy analysts spend in repetitive tasks such as collecting and handling data to create reports and actions. Their support is second to none, and the dashboard is great! We have tried many a software for our projects, but Wattics has excelled above all!”

NICK WOOD
OPTIMISED ENERGY

“I am now able to properly run my energy management programmes with ease of analytics. I have increased my revenues by 200% just by using this software over the past year! The software has a great way of displaying energy analytics in a way that makes our clients love it. On top of this, the M&V functionality is robust and follows IPMVP protocols of measurement and verification.”

CHRIS MBORI
MANAGING DIRECTOR, EENOVATORS

“Great platform for energy costs allocation and efficiency verification. The support team has been great, from data integration to hardware configuration. This is probably the platform's best asset. The platform has been a great help in evaluating energy cost for different processes. The ability to measure, predict, analyze data and generate reports in a single tool, with an intuitive interface, has been of great value for our industrial customers.”

MICAH ORTÚZAR
ENERGY SOLUTIONS MANAGER, BOLDO ENERGIA

“Extremely user friendly, versatile and reliable. A "must have" tool for energy managers! Wattics has made energy management a much easier task! It simplifies data handling and trends analysis. The platform speeds up decision making and enables continuous improvement of energy performance.”

ABOUT ENERGYCAP

ENERGYCAP.

EnergyCAP has helped more than 10,000 energy managers in government, education, and commercial organizations drive value from their utility bills and energy data. Clients use their comprehensive EnergyCAP software-based solution to streamline utility bill processing and auditing, track energy and greenhouse gas data, process campus and tenant chargebacks, target reduction goals, benchmark facilities, submit to ENERGY STAR, measure and verify energy & cost savings, create budgets and forecasts, and much more.

Featured Testimonials

“It was important to the Energy Office to find a platform that would be robust enough to hold and track all of the details that were needed to support tracking energy reduction, as well as support our purchasing of deregulated commodities. I think that it is clear that our Office would not function well or efficiently without [EnergyCAP].”

EMILY HUNTER SOONTORN SARATHOOL
ENERGY DATA PROGRAM MANAGER, STATE OF MARYLAND

“The integration and automation features of EnergyCAP will greatly enhance our efforts to manage our many utility accounts, track and analyze usage data, and find ways to reduce energy consumption in City buildings. The City of Chandler will be a more efficient organization with EnergyCAP.”

KRIS KIRCHER
FACILITY MAINTENANCE MANAGER, CITY OF CHANDLER

“We are already using EnergyCAP to audit incoming bills. We will use it to track avoided costs due to our actions and not just beneficial weather patterns. We want to use EnergyCAP to push out reports to elevate awareness of City Department Directors and top decision makers regarding their energy consumption and progress towards goals. EnergyCAP will be the ‘quarterback’ of our energy management program.”

JASON LAROS
CITY ENERGY MANAGER, CITY OF TUCSON

“We use this software to track a very large number of accounts across a diverse state that is completely deregulated for electricity and natural gas supply. We have many locations, vendors and reporting needs. This software has met all of the ones we have faced so far. The company has been terrific with great response time and better yet, they are always friendly and cheerful no matter what we have done or problem we have created for ourselves.”

KATHLEEN SLUSHER
DIRECTOR OF ENERGY PROCUREMENT, STATE UNIVERSITY OF NEW YORK

ABOUT VEOLIA NORTH AMERICA

Veolia North America (VNA) offers a full spectrum of water, waste and energy management services, including water and wastewater treatment, commercial and hazardous waste collection and disposal, heating and cooling networks, energy consulting and resource recovery. VNA helps commercial, industrial, healthcare, higher education and municipality customers throughout North America. Headquartered in Boston, Mass., Veolia North America has more than 7,000 employees working at more than 150 locations across the continent.

Featured Testimonials

“Our mission is to promote environment sustainability and use our resources responsibly to reduce ecological impact. Through our infrastructure investment in cogeneration technology and now our partnership with Veolia, we will continue to make strides in supporting our mission by efficiently operating our cogeneration plant operations, meeting all emission targets, and supplying reliable energy to the campus – safely.”

JOHN OZUROVICH
DIRECTOR OF FACILITIES, SADDLEBACK COLLEGE

“Veolia is a company that wants to take care of waste in a safe and environmentally-friendly way. We are all extremely happy with Veolia and all of their services they have provided us over the years.”

EHS UNIVERSITY

“Through this partnership with Veolia, we are able to maintain the comfort of our visitors and support the delicate air and water temperature requirements of our aquatic plants and animals. The use of Veolia's chilled water system and electronics recycling services stands as a testament to the National Aquarium's focus on sustainability and supports our mission to conserve the world's aquatic treasures.”

JOHN C. RACANELLI
PRESIDENT AND CHIEF EXECUTIVE OFFICER, NATIONAL AQUARIUM

“Other vendors that we have worked with in the past rely heavily on incineration as the preferred disposal method for a variety of waste streams. Veolia has put a considerable amount of thought and effort into providing us with sustainable disposal alternatives. During the pandemic the University approached Veolia regarding recycling/reuse options for uncontaminated laboratory gloves. Veolia provided a waste to energy solution that keeps the used gloves from entering landfills. Veolia and Pitt EH&S work collaboratively to develop solutions that align with the University's sustainability mission.”
