Volunteer Management Software Category

Most nonprofits depend on volunteer work to run a part of their functions. Volunteer management software assists these organizations to find and manage volunteers. Considering that volunteers are not required to contractually commit for a particular time period to work with nonprofits, these foundations need to ensure they have a big enough volunteer pool who can support them in a motivated manner.

With volunteer management software, you can efficiently manage volunteer information like contact details, interests, skill sets, availability, and causes they are interested in. The system offers portals for volunteers to sign up for a generic team or for specific programs and activities. You can match volunteers with open programs based on their profiles and delegate them to the right department or team. The platform empowers you to track volunteer efficiency and activity, and interact with loyal volunteers.

ABOUT NATIONBUILDER

NationBuilder offers everyone the technology and community infrastructure to lead people to greatness. Their products and services include accessible solutions for nonprofits, advocacy groups, businesses, and political campaigns of all sizes as well as infrastructure options for networks and large-scale organizations.

Featured Testimonials

“We’re going to focus on our volunteer movement because we now have organized regional teams and the ambition to give our volunteers central roles in our campaign. By giving them access to NationBuilder tools like our website, communications, and people, our staffers, volunteers, and candidates can work together and there’s no real distinction. If you want to do something and you’re able to do it, whether you’re a staffer or a volunteer, you can be part of the project.”

LOES VAN CLEEMPUT
PROJECT MANAGER, GROEN

“[Because of COVID-19] all of our programs had to pivot, but NationBuilder had to pivot the least. It was the easiest service to support an all-digital event because all the forms and infrastructure were built; everything was running smoothly. It was a huge time saver. If we hadn’t had a CRM and data platform like NationBuilder to support us, it would have been a much harder few months.”

HALSEY PAYNE
VOLUNTEER COORDINATOR, EARTHDAY.ORG

“Prior to this, it just felt like I had all these puzzle pieces scattered on the floor, and all the pieces are needed. NationBuilder puts all of those puzzle pieces into one great picture. I recommend NationBuilder more than any other CRM because it puts everything in one place, and that takes a load off your mind when you’re overseeing a project in which many pieces are required for success.”

BREEANNE HOWE
DIGITAL COMMUNICATIONS DIRECTOR, MARSY’S LAW FOR ALL

“It was a technology that we needed to aid our expansion. Every chapter was maybe set up on three or four different platforms trying to do email, contact management, membership, and doing all its communication via social media. NationBuilder helped us pull a lot of that into one place. As a whole, we’ve been really pleased with how it’s helped connect all of our organizations.”

ABOUT VOLUNTEER SOFTWARE

Volunteer Software - they've devoted over twenty years to developing volunteer management software specifically designed to streamline your volunteer management duties. Their program, the Volunteer Reporter, offers an array of powerful features that will help you create custom reports, spreadsheets, templates, mail merges, volunteer profiles and much more. This Windows-based program is extremely user-friendly and was developed for both the beginner and advanced computer user.

Featured Testimonials

"We use Volunteer Reporter and have been extremely happy with the program and technical support. We have been using Volunteer Reporter for about 3 years now. All reports and statistics we generate with Reporter coincide with the needed documentation for reporting in grants, FSR's, etc. Also, we are given regular upgrades, so the program is constantly improving itself. The support team has always been very friendly and helpful to resolve any problems. We also love that workstation managers can enter their own hours via our website using the Web Assistant feature in Reporter."

JULIA TRAWEEK
PROGRAM DIRECTOR, RSVP AND VOLUNTEER CENTER

"I've used Volunteer Reporter for nine years and I really like it. The technical assistance is great - quick response, polite people who are very patient. I was extremely impressed with their response to requests for changes/additions to the software. Spent a great deal of time making the decision of which software to purchase and I've always been satisfied with my choice."

SUSAN PEACOCK REEHL
WESTARK

"I have been using Volunteer Reporter and now use their online reporting system (Web Assistant) where volunteers or stations can add hours through my website and I have to say my hours being reported have increased by at least 20% (guessing). It has saved me and my volunteer coordinator hours of work. Every morning we simply review the hours reported and then simply "accept" them and they all are downloaded right into our database! Takes five minutes! Volunteers can apply that way too."

SUSAN CONTRERAS
CAPITOL REGION

"We here at the Foster Grandparent Program use a program named Volunteer Reporter. It is very useful and has everything and more that we could want. The nice thing is that the customer service is outstanding and will help you in a very timely manner. I have never had to wait! In addition, their prices are so affordable you can't afford not to allow them to do all the work for you. All you need is to enter the volunteer's information. I highly recommend this program for anyone that wants something easy yet allows very diverse reporting, labeling, letters, etc."
