

Data Governance Software Category

SPRING 2026
Customer Success Report

Data Governance Software Category

Data Governance includes both organizational policies and processes that are related to the management of data. Data governance ensures that a company's data is accurate, audited, managed, secured, and documented (in terms of which data the organization holds). And, a data governance program is a set of policies and processes that help organizations manage data.

Data governance software can lead to a decrease in data management costs, improvements in data quality, and better access to all data for the stakeholders. For example, a good data governance program defines a company's master data model (i.e. a clear definition of customers, products, etc.), details the data retention policies, and delineates who will be assuming the roles and responsibilities of data authoring, curation, and access.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

2026 Customer Success Awards

MARKET LEADER

ABOUT ALATION

Alation is the leader in enterprise data intelligence solutions, including data search & discovery, data governance, data stewardship, analytics, and digital transformation. Alation's initial offering dominates the data catalog market. Thanks to its powerful Behavioral Analysis Engine, inbuilt collaboration capabilities, and open interfaces, Alation combines machine learning with human insight to successfully tackle even the most demanding challenges in data and metadata management. More than 500 enterprises drive data culture, improve decision-making, and realize...

FEATURED TESTIMONIALS

“Alation puts information that you need where you need it and when you need it. Our analysts now write ad hoc queries two times faster and are able to both find and share data and queries more efficiently for their jobs.”

VALERIE STEINBRUGGE
HEAD OF DATA GOVERNANCE, EBAY

“Alation helps us with our governance audits. It holds our policies, procedures, and data flow diagrams via lineage.”

AMBER O'CONNELL
DIRECTOR OF DATA GOVERNANCE, STATE OF TENNESSEE

“We chose Alation for data governance and metadata management because it's so user friendly for business analysts.”

LORI HERMANSON
SR BUSINESS ANALYST DATA ANALYTICS, AVISTA

“With Alation, data governance becomes part of the way you work with data.”

UMID AKHMEDOV
DIRECTOR, HEAD OF ARCHITECTURE, DATA & ANALYTICS, FLSMIDTH

ABOUT ATLAN

Atlan is a modern data collaboration workspace (like Github for engineering or Figma for design). By acting as a virtual hub for data assets ranging from tables and dashboards to models & code, Atlan enables teams to create a single source of truth for all their data assets, and collaborate across the modern data stack through deep integrations with tools like Slack, BI tools, data science tools and more.

128

[VIEW ALL REFERENCES](#)

FEATURED TESTIMONIALS

“We used to have a data catalog. We had Informatica EDC. The motivation to look for a different solution came from some difficulties in implementing certain features like lineage, a business glossary. It was kind of frustrating, and it came to a point where we felt like the technology was kind of blocking us from reaching where we wanted to go. And that was the spark to look into the market for new technologies and platforms.”

DANRLEI ALVES
SENIOR DATA GOVERNANCE ANALYST, PORTO SEGURO

“I express my gratitude by saying, Atlan has not only been a vendor. It's like a partnership, but it's almost like a family. They create this family environment, like they truly care about your success and they want you to succeed as much as we want to succeed.”

JESSIE BUELTEMAN
ENTERPRISE DATA GOVERNANCE, ELASTIC

“Implementing a data catalog is about adoption. After taking a look at the best catalogs on the market, I chose Atlan, and I would choose Atlan again if I had to. It's the best UX, best experience, and best adoption.”

OTÁVIO LEITE BASTOS
GLOBAL DATA GOVERNANCE LEAD, CONTENTSQUARE

“Atlan made the most complex data concept, which is data governance, look simple and easy to use. Because of its intuitive UI, Delhivery users love to return to Atlan for any issues they face with metadata.”

LOKENDAR REDDY KOYA
SENIOR DATA ANALYST, DELHIVERY

ABOUT COLLIBRA

Collibra is the Data Intelligence company. They accelerate trusted business outcomes by connecting the right data, insights, and algorithms to all Data Citizens. Their cloud-based platform connects IT and the business to build a data-driven culture for the digital enterprise. Global organizations choose Collibra to unlock the value of their data and turn it into a strategic, competitive asset.

104 TOTAL CUSTOMER REFERENCES

VIEW ALL REFERENCES

FEATURED TESTIMONIALS

“Collibra enabled ASN Bank to bridge its data silos, uniting data risk, data management and data compliance so we understand our data better and are not managing the same concepts three or four times. Less time spent trying to understand what data means, finding the right data or sorting out data quality means more time to focus on value-add functions like calculating risk or marketing to acquire more customers and grow revenue.”

KASPER KISJES
ENTERPRISE DATA CATALOG IMPLEMENTATION LEAD,
ASN BANK

“Collibra is essential to our data-driven transformation at SIGNAL IDUNA. It is the umbrella over on-premises and cloud environments, unifying data silos to create value for customers. Collibra means we have one place for information about data quality, ownership, and lineage and whatever the type of insurance they manage, our staff can communicate better, be more precise, and deliver better solutions for customers.”

ANDREAS ZOLNOWSKI
CENTER OF EXCELLENCE LEAD DATA OFFICE/
GOVERNANCE, SIGNAL IDUNA

“Without Collibra we would be massively inefficient in the way we build and develop the data products we need. Collibra is the shop window into our data offering and an easily consumable way for people to find the information they need. It is foundational for data governance and leveraging data within an organization.”

STEVE TABERNER
DATA GOVERNANCE MANAGER, KINGFISHER

“Data users can now get an integrated business view of their technical metadata, data quality, data movement controls, and all business metadata in a single central universal platform.”

VIKRAM CHOPRA
SENIOR MANAGER, SINGLE-FAMILY, DATA & DECISIONS,
FREDDIE MAC

FEATURED TESTIMONIALS

“With Immuta, we've got a better pane of glass people can audit so our data governance team has a better window into what's happening, who has access to what. We've got simpler controls than previously, which reduces some of the friction of bringing new data products and new people onboard.”

KURT GARDINER
SENIOR DATA ENGINEERING MANAGER, DATA AND MACHINE LEARNING, NIB GROUP

“Together with AWS and Immuta, we are delivering immediate value to the public sector by enabling customers to move data to a secure cloud environment for production, development, or the design of new data architectures while maintaining security, control, and granular access.”

WADE ELLERY
CHIEF TECHNOLOGY OFFICER, RADIANT LOGIC

“Immuta does all kinds of magic translating this policy into a native format — let's say Snowflake or Databricks or Redshift — and I know that within the space, the policy will be executed. I don't need to worry about the scale.”

YARIK CHINSKIY
CHIEF ARCHITECT, JPMORGAN CHASE

“Immuta has succeeded in giving us a way to manage security and privacy in our data platform. We can centralize policy decisions and then drive them through our security and privacy teams.”

“Security and compliance are paramount in healthcare, where protecting patient data is as critical as providing quality care. With Saviynt Identity Cloud, we have created a blueprint for modern healthcare security, one that ensures seamless and timely access for healthcare workers while maintaining strict governance and regulatory compliance. This collaboration has helped us automate complex processes, reduce risks, and scale securely as we continue to expand.”

KUMAR K V
CHIEF INFORMATION SECURITY OFFICER, NARAYANA HEALTH

“Identity governance is critical to UWA's strategic objective of improving student experience. By standardising, simplifying, and centrally managing user identities, we made it frictionless for our students to access applications and systems. Even more importantly, Saviynt's solution has significantly enhanced our security, since we now know who has access to data and whether or not that access is appropriate.”

LEE PATTERSON
CHIEF INFORMATION SECURITY OFFICER, THE UNIVERSITY OF WESTERN AUSTRALIA

“Having very granular cloud security policies and standards, but also having a way to detect if there's a non-compliance or identify folks that get outside the guidrails, we set Saviynt as a key tool in our control framework that helps us do that.”

ARNOLD ABERNATHY
DEPUTY CHIEF SECURITY OFFICER, TOYOTA CONNECTED

“Our on-prem solution could only manage other things on-prem, and Saviynt has the ability to manage things both on-prem and in the cloud, so that was one of the things that made us realize that this is really a good solution for us in both realms.”

ABOUT DATAEDO

Dataedo is a team of software and database developers with 15+ years of experience with SQL Server and Oracle database design, development & maintenance. They worked with transactional systems, ERP/CRM, web applications and data warehouses, both third party and their own. In many projects in which they participated, they lacked proper documentation, communication and effective transfer of knowledge which led them to development of Dataedo the tool they were always missing.

ABOUT SELECT STAR

* SELECT STAR

Select Star is a modern data governance platform that helps organizations manage and understand their data at scale - enabling AI, analytics, and self-service across the business. It automatically catalogs datasets, traces end-to-end lineage, and builds a shared business glossary and semantic layer, so teams can confidently work with trusted data. With a user-friendly data portal and built-in automation, Select Star supports use cases including data democratization, data governance, semantic layers, and cloud data migrations—serving as a foundational layer for enterprise AI and data...

FEATURED TESTIMONIALS

“Select Star is a very technical product that works great for the data team. It's also sufficiently non-technical and user-friendly enough for the business stakeholders to also go in there and see what's going on and how things are operating within the data platform.”

PHIL WARNER
HEAD OF DATA, PANDADOC

“Without Select Star, we were blind to how our team was using data. Now we can discover what's between the dbt transformation layer, BigQuery job pipelines, and what's in our Looker.”

CHRISTINE LIU
DATA AND ANALYTICS LEAD, ANVYL

“Before Select Star, the same metric — like revenue — could show up in multiple places with different calculations, leading to conflicting reports.”

KOLBY NELSON
DATA SERVICE MANAGER, PENNANT

“With Select Star users can find data sets a lot more easily based on popularity, based on certification and also about the ownership of that data.”

BEN RELF
ENGINEERING MANAGER, NIB GROUP
