

Energy Management Software Category

Energy Management Software Category

Energy management software (EMS) monitors and reports energy system utilization, reducing energy costs for companies. The platform includes features such as sustainability and carbon reporting, HVAC systems controls, energy data analytics, and real-time energy use tracking. It offers functions that improve energy utilization to minimize carbon emissions and promote efficient consumption.

Energy management software has common features with sustainability management tools. Both applications can be used in tandem and integrated with IoT-linked sensors that track energy use in real time. EMS monitors energy consumption from several sources and actively engages with energy-consuming platforms by changing energy use. It generates auditable energy usage reports and offers data analytics features to digest information related to energy consumption.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ▣ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ▣ Customer reference rating score
- ▣ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ▣ Total # of profile views on FeaturedCustomers platform
- ▣ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ▣ Social media followers including LinkedIn, Twitter, & Facebook
- ▣ Vendor momentum based on web traffic and search trends
- ▣ Organic SEO key term rankings
- ▣ Company presence including # of press mentions

COMPANY SCORE

- ▣ Total # of employees (based on social media and public resources)
- ▣ Year-over-year change in # of employees over past 12 months
- ▣ Glassdoor ranking
- ▣ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

2021 Customer Success Awards

ABOUT AMERESCO

Ameresco, Inc. (NYSE: AMRC) is an independent, integrated, comprehensive energy efficiency and renewable energy company that is building a sustainable future with public organizations and private enterprise throughout North America and the United Kingdom. Through energy audits, innovative engineering, utility-scale solar farms and deep energy retrofits, Ameresco applies forward-thinking technology to the challenges of controlling emissions, enhancing energy security and shifting toward clean, renewable sources of power.

Featured Testimonials

“Our ongoing energy efficiency work with Ameresco has resulted in an important re-investment in our facility, with substantial operational and maintenance improvements. The changes were implemented in a cost-effective manner, without disruption to normal hospital operations. This project has benefits beyond financial as these improvements have enhanced the hospital environment for our patients and staff alike.”

PAUL WILLIAMS
DIRECTOR OF ENGINEERING, BOSTON CHILDREN'S HOSPITAL

“Ameresco made it easy for us to evaluate our purchasing options and understand the complexities of the energy market, resulting in measurable year over year savings across Red Robin's national energy footprint.”

AMANDA MCALLISTER
DIRECTOR OF CAPITAL PURCHASING, RED ROBIN

“Ameresco's expertise has allowed us to continue to build on this record of energy efficiency as we work to identify areas in which we can lower electricity costs and reduce expenses for the City and our customers.”

DENNIS LILLEY
AUSTIN ENERGY

“We were happy to have a comprehensive service partner in Ameresco to help us identify and implement a diverse set of meaningful clean energy projects in our community. These projects not only combat the continuing global impacts of climate change, but do so by virtually eliminating the Town's electric bill.”

ABOUT BUILDINGIQ

BuildingIQ (ASX:BIQ) helps building owners and operators worldwide lower energy use, increase building operations efficiency, and improve occupant comfort. They make this happen through 5i Platform of technology-enabled services that power a better Internet of Things (IoT) approach for buildings. They have proven to reduce HVAC energy costs and made significant improvements in LEED or NABERS ratings, increased market value, and they help facilities teams operate buildings at lower cost with a higher level of service.

Featured Testimonials

“BuildingIQ’s balance of ease of use and sophisticated features makes this work order management system perfect for our use.”

DAVID P. BERGSTROM
CHIEF OPERATING OFFICER, WELLINGTON MANAGEMENT

“This is fantastic. You are telling us what we need to know when we need to know. Your team is like the eyes and ears of our building.”

JOHN BOSE
MANAGER OF ENGINEERING SERVICES, ST JOHN OF GOD HEALTH CARE

“Energy Worksite provides a clear picture of the impact of our initial energy audits and HVAC and control system tune-ups. We are very encouraged by the savings we are beginning to see around the state. Our current estimate of program savings on the tune-ups is over \$3 million. That’s right on track with our project goals.”

SUE SEIFERT
PROGRAM MANAGER, IDAHO K-12 SCHOOLS

ABOUT BUILDINGOS

buildingOS

BuildingOS Facilities gives users the ability to centralize critical asset and work order information from multiple systems to provide consistent visibility across assets and sites, run portfolio and site-level analytics on operations, open access to the data to a broader set of users, and power better decision making about operations and capital investments. BuildingOS Facilities provides a comprehensive view into operations across commercial building portfolios to help drive lower operating costs and higher occupant satisfaction and productivity.

Featured Testimonials

“With BuildingOS, I have easy access to building and energy data, allowing me to dive into identifying energy savings for a customer quickly.”

DUANE KUBISCHTA
SENIOR ENERGY ENGINEER, KW ENGINEERING

“BuildingOS provides a technical foundation for our greenhouse gas reduction strategy by enabling an organized energy management process and informing our selection of commissioning and retrofit projects.”

JOHN ELLIOTT
CHIEF SUSTAINABILITY OFFICER, LAWRENCE BERKELEY NATIONAL LABORATORY

“BuildingOS is a prime example of how leading cities are using analytics for energy management. Data is critical to that: you can't effectively manage something you can't measure.”

CHRIS CASTRO
DIRECTOR OF SUSTAINABILITY, CITY OF ORLANDO

“BuildingOS gives us a bird's-eye view of all expenses so we can optimize for efficiency and savings. In our first year, we were able to save \$1.8 million in energy costs. For example, we use the Heat Map to fine-tune energy usage and meet our savings goal.”

JUSTIN OWEN
ENERGY MANAGER, WEBER STATE UNIVERSITY

Featured Testimonials

“If you increase sales by a dollar, only a small portion goes to the bottom line. When you save a dollar it goes directly to the bottom line.”

RAUL DOMINGUEZ
OWNER, WENDY'S

“Hypothetical models are great, but possessing real data to prove our theories to customers reinforces our recommendations and has the potential to bring additional savings because of the continuous submetering. GridPoint's granular, undeniable data is the critical link we were missing to accurately provide performance optimization, capacity planning and regulatory compliance in a variety of industries.”

WANDA LENKEWICH
FOUNDER AND PRESIDENT, CHINOOK SYSTEMS

“GridPoint's data-driven products play an essential role in our ability to affect our environmental impact across our restaurants nationally. The financial benefits we see continue to grow as we deploy the solution throughout our enterprise and is an exceptional by-product of working with partners like GridPoint.”

CAROLYN ANDERSON
EXECUTIVE DIRECTOR, CHIPOTLE MEXICAN GRILL

“The installation was complete in two days and we were able to stay up and running throughout the entire process.”

Featured Testimonials

“We have already seen significant benefits through the early identification of business events and thus the protection of our service to our customers. As we move forward, the functionality developed to date will not only continue to improve our reactive response, but fully support the delivery of a more proactive service from our ICC to both our internal and external customers.”

BERNIE RODDEN
MANAGER OF THE ICC, SCOTTISH WATER

“Within this project, we were able to provide two key milestones. First is 15% in energy cost avoidance. We also saw an improvement of 15% for productivity in our facility management processes and work streams. We have decided to scale up to 36 more buildings.”

GAVIN TEO
MANAGER FACILITIES AND ESTATE MANAGEMENT, JTC

“In the first six months, we demonstrated annual savings with the Azure IoT platform and ICONICS would total 500,000 euros. If we see similar savings in other buildings, we can save about two million euros each year, and the project will pay for itself a year in advance.”

GIORGIO COLOSI
REAL ESTATE AND FACILITY SENIOR DIRECTOR, INTESA SANPAOLO

“BIS' ultimate aim of creating a comprehensive data solution to manage all aspects of property asset management has been achieved through working in partnership with ICONICS. Whatever the request 'no' or 'we can't do that' does not appear to be words in their vocabulary; the project team regularly go above and beyond to consistently exceed expectations in tight time frames. At all times ICONICS have been professional, solution orientated and forward thinking. The successfulness of the partnership had already led to further development of the original system solution. ICONICS and the data capture and management solution is central to the future plans of BIS.”

Featured Testimonials

“The fact that we were able to integrate Schneider Electric EcoStruxure ADMS* with our existing systems, in particular the SCADA system, has proven to be one of the best features yet.”

CHRISTIAN NOCE
DMS INTEGRATION MANAGER, ENEL

“By applying Schneider Electric's EcoStruxure Plant we have achieved transparent and efficient operations management, with operational efficiency increased by 19% and energy costs reduced by 5%.”

WEI XIANGYUN
DEPUTY DIRECTOR OF THE LIQUID MILK PRODUCTION MANAGEMENT DEPARTMENT, YILI GROUP

“Schneider Electric's EcoStruxure Plant provides us with a more thorough picture of our infrastructure. We have been able to combine our automation, connectivity, and software into one system which allows us realtime control and visibility.”

RUSSELL BROWN
GENERAL MANAGER FOR ASSET MANAGEMENT, WILMAR SUGAR

“We wanted a building that would use only renewable energy and that would learn to optimize its energy usage to minimize emissions. That was achieved by combining Schneider's EcoStruxure building management system with Microgrid Advisor.”

KALLE HINTIKKA

Featured Testimonials

“The insights we can glean from interval smart meter data are essential for virtually all energy management and operational efficiency efforts. Getting data directly from utilities is anything but simple or easy. We are excited to be an Urjanet partner and to leverage their expertise and technology in solving all tiers of utility data access.”

VLADI SHUNTUROV
PRESIDENT & CTO, LUCID

“Given everything that it covers, it's a very cost-competitive service that Urjanet offers. Urjanet provides both whole building interval data and utility invoice data from more than 5,000 utilities worldwide. Its longstanding industry leadership also came highly recommended by Arconic's energy efficiency consultant.”

STEVE FRANK
ENERGY SOURCING MANAGER, ARCONIC

“At EnergyPrint, we understand the value of gathering quality data from utilities because we do it every single day. Partnering with Urjanet allows us to complement our team's unique capability while further developing our services to transform accurate and validated data into relevant and useful insights.”

PRISCILLA KOECKERITZ
PRESIDENT & CEO, ENERGYPRINT

“We chose the Urjanet-EnterScope solution because its intuitive interface shows us the per-minute energy costs of our air compressors, boilers, and HVAC equipment all in one place. It also provides the cost of water for individual cooling towers and office operations. This level of detail gives us insights into how much it costs to make our products in different regions around the world and how we can improve facility operations.”

ABOUT WATTICS

Wattics is an enterprise cloud energy management and analytics software used by growing teams of energy service companies, green building professionals, energy consultants & analysts to manage bulk utility/IoTs/sub-meter data to spot business energy inefficiencies, increase sustainability, improve indoor air quality and reduce CO2 emissions in industrial and commercial buildings. Wattics has a global presence through its partner network spread across more 52 countries around the world.

Featured Testimonials

“Great platform with innovative functionalities and excellent support. The platform enables us to view, visualize and report consumption patterns in diverse ways with simple and efficient functionalities.”

CAS DE ROIJ
BUILDING MONITORING SPECIALIST & DATA ANALYST, KLICTET ADVIES

“We started using the Wattics platform as an added service to our main business as a way to manage ongoing energy performance for our various LEED projects. Our experience couldn't have been better and we realized energy savings for our clients right away. Even though none of our staff has a background in energy management, we were able to deploy the meters and work with the platform easily.”

ALESSANDRO BISAGNI
FOUNDER & MANAGING DIRECTOR, BISAGNI ENVIRONMENTAL ENTERPRISE (BEE)

“I am now able to properly run my energy management programmes with ease of analytics. I have increased my revenues by 200% just by using this software over the past year! The software has a great way of displaying energy analytics in a way that makes our clients love it. On top of this, the M&V functionality is robust and follows IPMVP protocols of measurement and verification.”

CHRIS MBORI
MANAGING DIRECTOR, EENOVATORS

“Intuitive software, highly responsive team. Getting setup in & using Wattics had a very short learning curve. The software is built with "do it yourself" functionality, which has been great for our team - we are able to easily add/remove/reconfigure meters based on our frequently changing needs.”

ABOUT ENERGYCAP

ENERGYCAP.

EnergyCAP has helped more than 10,000 energy managers in government, education, and commercial organizations drive value from their utility bills and energy data. Clients use their comprehensive EnergyCAP software-based solution to streamline utility bill processing and auditing, track energy and greenhouse gas data, process campus and tenant chargebacks, target reduction goals, benchmark facilities, submit to ENERGY STAR, measure and verify energy & cost savings, create budgets and forecasts, and much more.

Featured Testimonials

“The integration and automation features of EnergyCAP will greatly enhance our efforts to manage our many utility accounts, track and analyze usage data, and find ways to reduce energy consumption in City buildings. The City of Chandler will be a more efficient organization with EnergyCAP.”

KRIS KIRCHER
FACILITY MAINTENANCE MANAGER, CITY OF CHANDLER

“It was important to the Energy Office to find a platform that would be robust enough to hold and track all of the details that were needed to support tracking energy reduction, as well as support our purchasing of deregulated commodities. I think that it is clear that our Office would not function well or efficiently without [EnergyCAP].”

EMILY HUNTER SOONTORN SARATHOOL
ENERGY DATA PROGRAM MANAGER, STATE OF MARYLAND

“We are already using EnergyCAP to audit incoming bills. We will use it to track avoided costs due to our actions and not just beneficial weather patterns. We want to use EnergyCAP to push out reports to elevate awareness of City Department Directors and top decision makers regarding their energy consumption and progress towards goals. EnergyCAP will be the ‘quarterback’ of our energy management program.”

JASON LAROS
CITY ENERGY MANAGER, CITY OF TUCSON

“We’ve been using EnergyCAP for around 2 years now, and in just that time period alone, we’ve saved thousands of dollars in direct refunds to our company from errors found in bills. The greatest value that our company receives from EnergyCAP is transparency in our utility cost and consumption, and enhanced ability to find potential billing errors that often result in refunds or bill credits. Savings and refunds found through the software have essentially paid for the cost of EnergyCAP.”
