Enterprise WiFi Solutions Category

Enterprise WiFi Solutions Category

Today, businesses need fast and reliable internet connectivity to be productive. This is true especially in sectors where companies utilize machine learning and artificial intelligence in their systems. This need has led to the rise of enterprise WiFi solutions. These are advanced networks that use strategic design, more access points, and better equipment to create reliable web connectivity for business users.

Enterprise WiFi utilizes slightly different management methods and protocols compared to consumer networks. The equipment can support bigger loads without being affected by dropped or dead signals. An administrator controls access so that only authorized people are able to connect. In short, enterprise WiFi is an advanced version of home Wi-Fi built to manage the greater demands of public institutions and businesses.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- Customer reference rating score
- Year-over-year change in amount of customer references on FeaturedCustomers platform
- Total # of profile views on FeaturedCustomers platform
- Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- Social media followers including LinkedIn, Twitter, & Facebook
- Vendor momentum based on web traffic and search trends
- Organic SEO key term rankings
- Company presence including # of press mentions

COMPANY SCORE

- Total # of employees (based on social media and public resources)
- Year-over-year change in # of employees over past 12 months
- Glassdoor ranking
- Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT ARUBA NETWORKS

aruba

a Hewlett Packard Enterprise company

Aruba Networks is a leading provider of next-generation network access solutions for the mobile enterprise. The company designs and delivers Mobility-Defined Networks that empower IT departments and #GenMobile, a new generation of tech-savvy users who rely on their mobile devices for every aspect of work and personal communication. To create a mobility experience that #GenMobile and IT can rely upon, Aruba Mobility-Defined Networks™ automate infrastructure-wide performance optimization and trigger security actions that used to require manual IT intervention.

Featured Testimonials

“ *The Aruba response was the most reassuring in terms of the ability to deploy a high-density Wi-Fi while considering our architectural constraints. Also, the stability of the Aruba platform was a key success factor.* ”

THIERRY VANEYCKE
TECHNICAL DIRECTOR, VIPARIS

“ *With our new Aruba Gigabit Wi-Fi infrastructure, including HPE Smart Rate multi-gig uplinks, we're not only meeting employee expectations, but we're also positioned to provide multi-gigabit bandwidth in the future without the disruption and expense of upgrading cable.* ”

KEITH MCKAY
NETWORK OPERATIONS SUPERVISOR, DREAMWORKS ANIMATION

“ *We chose the Aruba solutions because they delivered greater price for performance value and the portfolio included gigabit Wi-Fi access points specifically designed for residence halls/hospitality applications.* ”

JERRY BUCKLAEW
NETWORK ARCHITECT, UNIVERSITY AT BUFFALO

“ *As one of our broader technology goals was standardizing, Aruba provided the most holistic solution. It included Wi-Fi and the networking switches required for connecting the system to our wired LAN, which was also transitioning to HPE networking equipment.* ”

ABOUT CAMBIUM NETWORKS

Cambium Networks

Cambium Networks is a leading global provider of wireless broadband solutions that connect the unconnected. Through its extensive portfolio of reliable, scalable and secure WiFi and wireless broadband point-to-point (PTP) and point-to-multipoint (PMP) platforms managed by cloud-based software, Cambium Networks enables service providers; enterprises; governmental and military agencies; oil, gas and utility companies; Internet service providers; and public safety organizations to build powerful communications networks, reach users from 200 kilometers across mountain tops down to their devices, and intelligently manage their business Wi-Fi infrastructure through end-to-end network visibility and actionable analytics.

Featured Testimonials

" *The school district needed WiFi connectivity in every classroom and immediate technical support to ensure uptime. cnPilot E400 and cnMaestro management gave us reliable connectivity and centralized real-time management.* "

EMANUELE LOI
SYSTEM ENGINEER, SICE TELECOM

" *We recommend cnPilot™ E400 enterprise WiFi indoor modules and E500 enterprise WiFi outdoor modules, with an ePMP™ distribution network, managed by the cnMaestro™ management system. This package of technology is proven to be reliable and cost effective, and is now deployed for business and industrial customers in more than 50 sites on Australia's Eastern Seaboard.* "

BRUCE MCGREGOR
GENERAL MANAGER, SOUTHERN REWORK

" *Of the three WiFi networks we tested, Xirrus [had] the fastest and most reliable [Wi-Fi APs]. Now, we have excellent throughput. We have excellent coverage. And we have fantastic cloud management tools.* "

CLIFFORD RUSSELL
CHIEF INFORMATION OFFICER, MOREHOUSE COLLEGE

" *We chose Cambium's products because we knew it would bring us high quality, scalability and a good experience to our customers. With ePMP Elevate, we now we have a solution to migrate our network. We always wanted to use Cambium equipment, but it was impossible to replace all of our network equipment. With ePMP Elevate, we can now migrate every customer on our unsynchronized equipment to an ePMP Network, without any installation changing, and getting all of the Cambium benefits as synchronization, automatic transmit power, frequency re-use, and high capacity for our customers.* "

ABOUT CISCO MERAKI

cisco Meraki

Cisco Meraki believes that by simplifying powerful technology, Cisco Meraki can free passionate people to focus on their mission and reach groups previously left in the darkness. Founded in 2006, Meraki has grown to become an industry leader in the IT space, with over 140,000 customers and 2 million network devices and counting online around the world. Cisco Meraki's comprehensive set of solutions includes wireless, switching, security, communications, EMM, and security cameras, all managed through Meraki's web-based dashboard interface. This allows customers to seize new business opportunities and reduce operational costs.

Featured Testimonials

66 *We were able to successfully deploy 30 remote sites in 30 days with Meraki. We added device serial numbers in dashboard before shipping. When the devices connected to the network, they downloaded the configs and started working. It was seamless.* 99

DAN HUTCHISON
NETWORK INFRASTRUCTURE ENGINEER, SAINT LEO UNIVERSITY

66 *The best part of the Meraki solution is the central control via dashboard. It's a very clear and understandable interface with features like sign-on via Facebook built in.* 99

ANDREAS KAHLENBACH
IT DIRECTOR, FRIEDRICHSTADT-PALAST

66 *We were looking for an outdoor WLAN solution to provide free WiFi access for our international guests. The Meraki solution convinced us from the very beginning. The performance was great and exceeded our expectations.* 99

MATTHIAS AMACKER
IT DIRECTOR, ZERMATT BERGBAHNEN AG

66 *The ease-of-use and how easily you are able to get information is exceptional. Network administrators are able to see information that is useful for managing the network at a glance, and are able to access it at any time and troubleshoot as needed.* 99

ABOUT PURPLE

purple

Purple's goal is to ensure that physical spaces survive and thrive for current and future generations, by helping them to stay relevant and ensuring visitors enjoy going to them. Purple helps venues optimize safety, enhance the customer experience, and drive revenue. This is achieved through connecting multiple data sources – much of which is already in place – such as WiFi, sensors, BLE beacons, PoS, and CCTV, to our cloud-based platform. From here, businesses get a holistic view of exactly what is happening in their space, enabling them to make informed decisions and drive meaningful action via a number of built-in intelligent space solutions. Purple solutions are used globally in more than 65,000 venues, across 120 countries where we serve more than a million end users every day. Through Purple, businesses have been able to understand who their customers are, how they behave when they're onsite, and ...

Featured Testimonials

" *During the initial demonstration by Smarter WiFi, we found Purple's platform to be very easy to use. All customer data and analytics were presented in a really straightforward layout, which puts the marketing team at ease when using it. Purple is what we specified that we needed from the outset, it offers great guest WiFi and provides us with meaningful insights, so it's a real win-win.* "

CHARLI MCCANN
MARKETING AND PR MANAGER, WOK&GO

" *We found that Purple was very easy to work with and the installation was smooth and straightforward. Free reliable Wi-Fi has become a must have for our guests, we want them to be able to easily share the fact that they are having a great time at our Zoo's and Purple's robust system copes well with the high amount of guests we have on-site at any one time.* "

LOUISE SMITH
MARKETING MANAGER, PAIGNTON ZOO

" *Purple WiFi is an easy to use, functional piece of software with some interesting customer data. I particularly like that you can see how many times certain individuals have logged in – this is a really easy way to see loyal customers and reward them.* "

LORNA ALLISON
MARKETING MANAGER, INC GROUP

" *The experience of working with Ruckus and Purple WiFi was really good, the team couldn't have been more helpful. We can now see who is logging in and where they are in the centre when they use the service, all of which gives us valuable consumer insight upon which we can build more effective marketing campaigns.* "

ABOUT DATTO NETWORKING

datto | NETWORKING

As the world's leading provider of IT solutions delivered by Managed Service Providers (MSPs), Datto believes there is no limit to what small and medium businesses can achieve with the right technology. Datto offers business continuity and disaster recovery, networking, business management, and file backup and sync solutions, and has created a one-of-a-kind ecosystem of partners that provide Datto solutions to half a million businesses across more than 130 countries. Since its founding in 2007, Datto has earned hundreds of awards for its rapid growth, product excellence, superior technical support, and for fostering an outstanding workplace.

Featured Testimonials

"*A big selling point was the cloud-managed piece. We don't have to be on site to make a change. Because it's cloud based, we can manage it from anywhere.*"

SEAN GRAHAM
INTERNATIONAL BIRD RESCUE

"*Feedback has been excellent from all hotel guests. Open Mesh has a perfect product - [we have] seen the complaints drop to zero and documented feedback from guests (for example, on Tripadvisor) that the WiFi network is fast, reliable and one of the best in the city.*"

ANDREW WALKER
THE GRESHAM HOTEL

"*With Datto Networking, the facility delivers state of the art WiFi to a generation of people who like to be connected at all times, offering the NMLRA an opportunity to attract more visitors at the event - and to keep them coming back each year.*"

RYAN FACKEY
SOLUTIONS ARCHITECT, PROSOURCE

"*We used to sell a much more complex and expensive solution that was not the right fit for our SMB clients. When Datto started selling networking products, we were very excited to offer a solution that is both simple to deploy and at a price point that is perfect for our clients.*"

ABOUT INDIO NETWORKS

Indio Networks is a solutions provider for the hotspot and wireless ISP industry. They provide carrier-class Operational Support System (OSS) for managing wireless networks and hotspot systems. In layman's terms, they provide all the necessary products and services necessary to operate wireless hotspots and ISP businesses from a central location. Their hosted, backend management solution - WiFiLAN - help hotspot operators and service providers to easily install hotspots in any public venues and operate them from a central console.

Featured Testimonials

WiFiLAN is a vital part of our operation. We use WiFiLAN for support and for monitoring information. We have about 200 locations that we use to monitor our Wi-Fi systems. It enables us to give various reports to our customers as far as daily login reports, monthly reports, yearly reports and various other reports. I personally have been using WiFiLAN for about seven years. It makes us look very good as a business and very well organized. I've enjoyed over the past seven years working with the [Indio Networks] team. They make it very easy to work with. They are on time doing things we ask. Like specially programming that we need to have done. Customize our reports that we need to have laid out differently. There are so many other functions of WiFiLAN. Companies that do advertising can get even more deeper in customizing and monitoring activities. I have used other monitoring programs, WiFiLAN is by far the best.

TYE WILSON
ZOOM INFO SYSTEMS, INC

Thanks very much. I really like the UniBox so far. You guys have done an excellent job with the design.

GLEN EBBAGE
IT MANAGER, KINGFISHER BAY RESORT

When you are looking for a wifi solution and want hassle free products and services, then [Indio Networks] is the answer. They are smart, professional, very responsive to their clients and easy to work with. Our company is working with [Indio Networks] products and till date there has been no complaint for any reason. In the support of [the] [Indio Networks] team, they are always available, remotely or on premises, whenever we need them. Thank you for [a] great product and great support.
