

Application Security Software Category

SUMMER 2026
Customer Success Report

Application Security Software Category

Application security software helps to make apps safer by detecting, resolving and improving their security. This benefit mostly occurs during the development stage, but the platform also includes methods and tools to safeguard apps after their deployment. The product has become vital as hackers are increasingly focusing their attacks on applications.

Hundreds of application security solutions are available to protect the different aspects of your apps portfolio. These include evaluating unwitting coding threats, locking down programming changes, auditing access rights and permissions, assessing encryption options and more. Specialized tools are available for network-based applications, mobile apps, and firewalls created specifically for web apps.

Customer Success Report

Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

2026 Customer Success Awards

FEATURED TESTIMONIALS

“Armor is a strategic partner to DeliverHealth. Their software and expertise are key components of our security profile that safeguards both our clients’ and their patients’ data. Armor’s preemptive defense approach, combined with expert tuning of Microsoft Security tools, has reduced our risk and costs. As we launched InstaNote—our GenAI-powered solution that eases clinician burden and enhances patient care—Armor helps us ensure that our environment remains secure and compliant.”

JULIANA ALSTON INHOFFER
DIRECTOR, GOVERNANCE RISK AND COMPLIANCE,
DELIVERHEALTH

“Armor security services not only provided valuable threat protection, but triggered new internal procedures and practices strengthening our security infrastructure, allowing us to serve Fortune 500 corporations.”

BOB WENZLAU
CHIEF EXECUTIVE OFFICER, FOUNDER, TERRADEX

“Security issues have escalated to a point that companies won’t do business with you unless you demonstrate that you have a highly secure network.”

SUNIL PADIYAR
CHIEF TECHNOLOGY OFFICER, FACILITYSOURCE

“The way Armor has security locked down, and the data centers already being compliant, made it a very easy choice.”

BRYANT MILES
HEAD OF INFORMATION TECHNOLOGY, ORTHO
KINEMATICS

ABOUT CHECKMARX

Checkmarx

Checkmarx, founded in 2006, is a leader in application security solutions, having developed the first platform for true Source Code Analysis (SCA) with its marquee solution: Static Application Security Testing (SAST). Checkmarx's mission is to enable organizations to secure applications from the start, reducing risk and cost along the way. Platforms offer maximum application security for software developers and security experts throughout the Software Development Life Cycle (SDLC), in both Enterprise and Cloud platform models.

FEATURED TESTIMONIALS

“We view Checkmarx as our trusted partner. They’ve elevated our security posture by consolidating our SAST, SCA, and API Security into a unified platform, Checkmarx One, enabling us to achieve vulnerability remediation, reduce noise, and benefit from strong support.”

MATTHEW HUREWITZ
DIRECTOR, PLATFORMS AND APPLICATION SECURITY,
BEST BUY

“The regular scans with Checkmarx help us to reliably meet compliance requirements, which in turn is the prerequisite for recognized industry certifications—and these strengthen our customers’ confidence in the security of our software.”

TECK CHUAN LIM
SENIOR DIRECTOR, SOFTWARE GMBH

“[Checkmarx] competitors either don’t manage variable use cases, have unusual implementation requirements, or require adding capabilities from separate portfolio tools which are not well integrated.”

ERNEST M. PARK
CISO, MANAGING PARTNER, AIRIUS

“After reviewing the Checkmarx platform, I’m not sure how Veracode is able to exist while being at a similar price point.”

“Outpost24 does a great job by detecting vulnerabilities proactively and we can check any vulnerabilities at the click of a button to get more detail. I'm also delighted with the support we received - the detailed risk findings presented in both technical and business context is a huge time saver in helping us prioritize fixes and collaborate with IT and DevOps, and share our progress with management.”

ERICH GIESINGER
HEAD OF WEB SERVICES AND INTERNET SECURITY, NZZ

“The Sweepatic Platform enables us to look at our attack surface from the outside, like a bad actor would do, and represents this view in an intuitive dashboard. As a result, we can easily find and remediate vulnerabilities and misconfigurations.”

JORIS CLAES
GROUP ICT MANAGER, KONINGS

“Sweepatic scored great in terms of value for money, the fast implementation of the solution, the expertise of the team and their flexibility towards RDW regarding feature requests.”

HARRY OTTENS
RDW

“Our security team can now track all ZNA's internet-facing assets each step of the way as digital transformation is further established throughout the hospital.”

ABOUT SUMO LOGIC

sumo logic

Sumo Logic is the next generation log management and analytics company that leverages Big Data for real-time IT insights. Sumo Logic cloud-based service provides customers with real-time interactive analytics at unprecedented petabyte scale. The Sumo Logic service is powered by patent-pending Elastic Log Processing™ and LogReduce™ technologies, and transforms log data into actionable insights for IT operations, application management, and security and compliance teams. Unlike expensive and complex premise-based solutions, the Sumo Logic service has a low TCO, can be deployed instantly, scales elastically and requires zero maintenance. Sumo Logic...

FEATURED TESTIMONIALS

“A big value of Cloud SIEM is its extended support for log source visibility and the ability to onboard traditional and non-institutionalized logs sources. Cloud SIEM parses, maps, and normalizes records from structured and unstructured data, which makes it quick and easy to get log sources up to rank in the correlation rules and bring them into the dashboarding and alerting.”

MARK COLTHARP
CHIEF REVENUE OFFICER, ZYSTON

“Sumo Logic helps us scale our security visibility and keep pace with the business as we launch new products, add customers and adopt new tools. As we grow, the marginal cost of adding visibility and enhancing what we have is minimal, which allows us to accommodate some pretty fundamental changes and scale the business much more quickly.”

RYAN BREED
SENIOR SECURITY ENGINEER, HASHICORP

“Cloud SIEM's out-of-the-box rules are powerful. Tuning them for our organization and infrastructure helped familiarize ourselves with the tool, prove value in our investment and optimize the platform so we could focus on true alarms that require our attention.”

HUSEYIN KARAARSLAN
SR. SECURITY ENGINEER, ROKU

“The Sumo Logic service allows us to generate insights we couldn't have achieved before.”

ABOUT ZIMPERIUM

Zimperium, the global leader in mobile device and application security, offers the only real-time, on-device, machine learning-based protection against Android, iOS, and Chromebooks threats. Zimperium was the first MTD provider to be granted an Authority to Operate (ATO) status from the Federal Risk and Authorization Management Program (FedRAMP). Headquartered in Dallas, TX, Zimperium is backed by Liberty Strategic Capital and SoftBank.

“We replaced a competitive solution with Zimperium because it was more enterprise ready and provided the best protection for our intellectual property and other confidential information. We were especially impressed by Zimperium’s on-device, proactive threat detection, its 360 degree coverage of all major risks and compliance issues and for the solution’s administrative advantages like support for multiple MDMs in a single tenant.”

HEAD OF INFORMATION SECURITY
MULTINATIONAL PHARMACEUTICAL COMPANY

“Employees have collected a group of devices that are a mix of their own endpoints, corporate endpoints, personal devices and mobile devices that they’re starting to use to build out their workspace. And this new workspace is going to travel, whether the people have to go back to the office or if they continue to work from home or from a sort of a hybrid scenario.”

PHIL HOCHMUTH
PROGRAM VICE PRESIDENT, ENTERPRISE MOBILITY, IDC

“Intertrust’s whiteCryption [now part of Zimperium] is very well supported and highly regarded inside the major card brands. By going with whiteCryption [now part of Zimperium], the credit card security assurance groups and PCI allowed us to utilize PIN validation when required.”

FOUNDER AND CEO
FELIX PAYMENT SYSTEMS LTD.

FEATURED TESTIMONIALS

“We use Indusface Web Application Scanning (WAS) for vulnerability assessment that provides us insights into our application security risk. One of the key reasons of our partnership with Indusface is their ability to continuously keep innovating around detection, using automated scanners, up and beyond OWASP top 10. It's imperative to expect minimum false positives from automated scanner, which Indusface delivers consistently. All the best to Indusface.”

CHIEF INFORMATION SECURITY OFFICER
AXIS BANK

“Securing a system which has no precedence, implemented for the first time in India and that too requiring protection of the fundamental right of a citizen was a huge responsibility that Indusface was asked to shoulder and I am extremely proud of my team to have delivered successfully and as per the set expectations and ensured secure elections for this Government of Gujarat initiative.”

K. C. KAPOOR
STATE ELECTION COMMISSIONER, GOVERNMENT OF GUJARAT

“Our complete ecommerce infrastructure is hosted on the cloud and we are glad to have Indusface as partner for web security. Due to their association with cloud service providers and prompt deployment options, Indusface was the preferred security choice. The on-demand and scheduled scanning helps us keep track of vulnerabilities that may otherwise damage our website or put customers at risk.”

SACHIN OSWAL
OMNI CHANNEL HEAD, SHOPPERS STOP

“We are a happy customer using AppTrana that takes complete care of tuning, analyzing and updating security policies to keep web-based applications secure. Now with CDN we also expect to get performance without compromising security. We are excited and looking forward to using it to provide better experience to our users without compromising security.”

ABOUT LEGIT SECURITY

Legit Security provides an application security posture management platform that secures application delivery from code to cloud and protects an organization's software supply chain from attack. Their enterprise-grade platform helps CISOs, application security and development teams successfully defend against the latest threats to your pre-production development environments and helps ensure governance, compliance, and integrity for every software release.

FEATURED TESTIMONIALS

“Visibility is the most important aspect of security. You can't defend what you don't know about. However, visibility in the SDLC isn't limited to faster threat detection and finding things that you otherwise wouldn't—it also helps create a collaborative culture of secure software development and innovation. Visibility gives engineers the ability to implement great ideas quickly with guardrails in place. Everyone acts and feels as part of the same team by meeting software engineers where they need to be to feel successful.”

TIM CROTHERS
CHIEF INFORMATION SECURITY OFFICER, MANDIANT

“Legit significantly helps organizations to modernize application security programs by seamlessly integrating security into agile development and our modern application stack.”

GLOBAL CISO
CHICAGO BOARD OF OPTIONS EXCHANGE

“Legit gives us direct, strategic visibility over all of our pipelines in the SDLC to ensure that we are able to develop software securely in a sustainable fashion.”

ERIK BATALLER
VICE PRESIDENT OF INFORMATION SECURITY, ACV AUCTIONS

“Legit gives us governance out of the box, and the ability to have visualization across our SDLC to improve our developer collaboration and security best practices.”

FEATURED TESTIMONIALS

“Oligo provides runtime protection against the exploitation of open source or third party vulnerabilities - not just “is this package running” but “what is this package doing?” Their engine drastically reduces the risk of supply chain exploitation, in a way that might make SCA in general obsolete.”

JAMES BERTHOTY
SECURITY ENGINEER, PAGERDUTY

“Oligo is set to increase the productivity of AppSec teams and reduce the risk of using open source by contextually prioritizing vulnerabilities according to actual vs perceived risk.”

ALEX NAYSHTUT
SR. DIRECTOR, HEAD OF PRODUCT SECURITY,
CELLEBRITE

“Oligo is the right solution for R&D teams because it surfaces only the relevant vulnerabilities with the right context, and it is available also during CI/CD.”

OR HILTCH
VP ENGINEERING, FORTUNE 500 COMPANY

“Oligo’s approach using package-level detection is unique - decluttering the noise while not compromising on performance and stability.”

ABOUT QWIENT AI

Qwient AI embeds security into every development phase. Its AI agents integrate with CI/CD pipelines to identify and automatically fix real-time vulnerabilities. By targeting exploitable threats and filtering out noise, Qwient AI helps developers ship secure code faster, reducing security teams' manual effort by up to 95%. Continuous security checks ensure compliance with required standards. By securing applications at the source, Qwient AI allows teams to focus on innovation instead of reacting to issues later.

ABOUT WALLARM

Wallarm is an AI-powered application security platform designed for modern web applications and APIs. It organically combines vulnerability detection with a next-generation web application firewall (WAF). Wallarm is developed on top of NGINX, an increasingly popular high-performance web server and load balancer used by 35% of the busiest 1000 websites. It targets clients with high loaded web projects in e-commerce, SaaS/PaaS, big data, news media, communication, and online payment markets.

FEATURED TESTIMONIALS

“Wallarm was the first WAF and API Security solution we introduced. We have learned and developed our security requirements through the WAF search and adoption project. One of the things we appreciated about the Wallarm partnership is the Security Platform functionality we can use “out of the box”. We have applied Wallarm platform settings to fit our security operations requirements through the project. Wallarm platform treats our application attacks in fully automated mode & we keep learning pretty rich platform functionality as we go.”

PETER HAMILTON
VP TECHNOLOGY, REMIND

“I would absolutely recommend Wallarm, in a heartbeat. They do what they say on the tin – meaning what they say they can do, they really do.”

ROB DAVIES
ROB DAVIES, VICE PRESIDENT OF ENGINEERING AND
LEAD ARCHITECT, REVENERA

“Wallarm offers an adaptive security platform including an integrated Web vulnerability scanner and NG-WAF solution with automatically generated security rules based on AI.”

CHRIS RODRIGUEZ
SENIOR SECURITY ANALYST, FROST & SULLIVAN

“With Wallarm, we've been able to scale API protection to the scale we need and manage with our infrastructure as a code approach.”
