KIM MOISTNER-BARTLETT

ABOUT ALADTEC

Aladtec's system is an affordable subscription-based online employee scheduling and workforce management system. Aladtec's System will allow your organization to: track licensing and certifications, automate reminders for approaching expiration dates or needed licensing, monitor operations, access and change schedules, view employee info and credentials 24/7 from any computer, smartphone or other mobile device with internet; save time & money, automate and manage employee time off, sign-up and trade requests which saves money in unplanned overtime and scheduling man hours; improve communications, send instant messages, texts or emails to fill your schedule; or update staff immediately.

"If you take one supervisor working on the schedule to create and fill overtime, approve leave, add in sick leave, etc. for 4 hours per shift from each squad that would equal out to 56 hours - that's 800 hours a year - or 20 work weeks! After switching to Aladtec we've reduced the time spent scheduling by 16 hours a week. Aladtec's time savings also allows for the ability to work further ahead in the schedule therefore getting overtime filled earlier and resulting in more notice for forced OT."

“I like using ZoomShift because of the visibility I have to see staff availability and the recent addition to include availability effective dates, which is perfect when scheduling students and their changing schedules. My staff like ZoomShift's mobile app which gives them the ability to request swaps and accept shifts, right on their phone. I like the mobility of ZoomShift because shifts are picked up much quicker.”
