WINTER 2023
Customer Success Report

Inventory Management Software Category

Inventory management software helps you track, organize, and manage material purchases, product sales, and other processes. The days of using pencil and paper to track inventory are long gone. Today, you can utilize platforms based on radio-frequency identification (RFID) or barcodes to view where raw materials are placed, when shipments arrive, and when products are shipped.

Inventory management solutions track goods all through the supply chain or the part of it relevant to a company's operations. This covers all phases from warehousing to shipping, production to retail, and the movements of parts and stock in between.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

Being able to manage our inventory across all our channels and the warehouse is a huge benefit and a big step forward for us. Seeing every order, what your profits and margins are, volumes per day, what you sell on different channels, and pricing detail are all especially important in our market when you can be priced out by as little as 50 cents!

DIMITRI CHERNYAK
PRESIDENT, PRIORITY TIRE OUTLET

With Brightpearl's support, we got set up in just 24 days; automating several time-consuming processes and putting all of our orders and inventory in one place. With Brightpearl up and running, we spend far less time on admin and have more flexibility with our resources.

KASIA KONWINSKA

With Fishbowl, it allows me to look at the whole inventory – everything – and focus strictly on those items that I'm going to be short on. And it allows me to address those concerns, those issues – try to resolve them before it actually affects production. Timing is important. Running out is not acceptable. Fishbowl allows me to take a look out and see what's going to be happening in the future. For me, that's a big advantage.

We initially thought it would require a huge investment to have a stock management system in place, in order to control our inventory across eBay, Amazon, Rakuten and other marketplaces across Europe. Now that we've found Linnworks we can do this very simply and it's enabled us to do things that we thought only large businesses could do.

EDDIE LATHAM
CO-FOUNDER, VELOCITY OUTLET

We transitioned from chaotic spreadsheet tracking to an automated system that real-time updates inventory across platforms. We can finally say goodbye to manual errors and working late nights!

DENNIS ROSELLO

The software is very easy to use, and the SkuVault team is amazing. I can now track the movement of all of my inventory and track everything my employees are doing. The people at SkuVault actually listen to our suggestions and often implement the functionality we ask for to their software without asking us to pay for it. We have been through many different software platforms, and this is the best partnership by far that we have experienced. I would recommend SkuVault to any company that needs better visibility of the work being done in their warehouse. Also, compared to most WMS's they are very affordable.

We needed inventory for two aspects of our business; we need inventory for ourselves and we need inventory of our distributors. Now, if the system is fairly complicated or unexpectedly costly for our distributors to use, then adopting that system is going to have some negative implications for our business. Clear Spider exceeded our expectations in this regard.

TREVOR BRUNING
