Breach & Attack Simulation Software Category

WINTER 2025
Customer Success Report

Breach & Attack Simulation Software Category

Breach and Attack Simulation (BAS) software helps to test an organization's cybersecurity defenses by simulating real-world cyber threats and attacks in a controlled environment. It allows companies to assess the effectiveness of their security measures and identify vulnerabilities in their systems. By simulating realistic attack scenarios, organizations can identify weaknesses in their defenses, assess the response capabilities of their security teams, and prioritize remediation efforts.

Benefits of adopting such software include enhanced cybersecurity preparedness and regulatory compliance. BAS software aids in compliance by providing evidence of regular security testing, a requirement in various industry regulations. Overall, adopting BAS software strengthens an organization's cybersecurity posture, improves incident response preparedness, and reduces the risk of successful cyber attacks.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✔ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✔ Customer reference rating score
- ✔ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✔ Total # of profile views on FeaturedCustomers platform
- ✔ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✔ Social media followers including LinkedIn, Twitter, & Facebook
- ✔ Vendor momentum based on web traffic and search trends
- ✔ Organic SEO key term rankings
- ✔ Company presence including # of press mentions

COMPANY SCORE

- ✔ Total # of employees (based on social media and public resources)
- ✔ Year-over-year change in # of employees over past 12 months
- ✔ Glassdoor ranking
- ✔ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

ABOUT BISHOP FOX

BISHOPFOX

Bishop Fox is recognized as the leading authority in offensive security, providing solutions ranging from continuous penetration testing, red teaming, and attack surface management to product, cloud, and application security assessments. Enterprises have been told that breaches are inevitable. But they don't accept that. They focus on offensive security because they believe securing modern organizations requires a "forward defense" approach that proactively uncovers and eliminates exposures before they are exploited.

51 — TOTAL CUSTOMER REFERENCES

FEATURED TESTIMONIALS

" The Bishop Fox assessment really helped us evolve our security processes. We grew quickly from a small organization, quadrupling over a year, and the guidance we received from Bishop Fox helped us prioritize certain areas and quickly get a phased security enhancement plan in place. This assessment was a great step forward in evolving our program to scale to our needs for the coming year. "

DAN BLAKE
CHIEF TECHNOLOGY OFFICER, ASPIRE

" Bishop Fox has demonstrated throughout the years that they're experts in our technology stack and have an ability to help us understand where we might be vulnerable before the adversaries have a chance to effect that value for our customers. "

CARL KUBALSKY
BUSINESS INFORMATION SECURITY OFFICER, JOHN DEERE

" Bishop Fox's reputation in the industry is exceptional. This project was uniquely challenging as it did not fit the typical profile and scope of an application pen-test. Despite the challenges, Bishop Fox was extremely professional and produced great results. "

VINNIE FALCO
AUTHOR, BOOST.BEAST

" With our partnership approach, any issues identified are thoroughly investigated, escalated, and ultimately fixed before they become a problem. "

ABOUT NETSPI

NetSPI™

NetSPI delivers application and network security solutions to enterprise organizations, globally. Their security testing experts and proprietary technology platform empower organizations to scale and operationalize their security testing programs. Contact them today to learn how they can help you catapult the sophistication of your programs and improve your organizations' security posture.

77 TOTAL CUSTOMER REFERENCES

VIEW ALL REFERENCES

FEATURED TESTIMONIALS

NelSPI has done an excellent job understanding risk and compliance and creating usable solutions at Groco. NetSPI has integrated with the internal Audit group and provided significant value to Groco's IS staff. The value of NetSP is based on its strong technical insights, a corn Comprehensive understanding of internal Audit and their realistic recommendations for remtdiotion.

DANIEL MATHEWS
INTERNAL AUDIT MANAGER, GRACO

NetSPI's work product helped bridge the gap between Internet security and application development groups. They provided pointers on communication and helped us internalize the whole process so we could keep it up on our own. And after the process is handed over to us they stayed available to provide support when we needed.

DANE SMILEY
INTERIM CHIEF INFORMATION SECURITY OFFICER, CARLSON WAGONLIT TRAVEL

With NetSPI, we do penetration testing of our web application and Android-based mobile applications. We like to get a fresh set of eyes on our code base, which is constantly changing. We are always adding and deploying new features.

MIKE SIEGEL
OFFENSIVE SECURITY STAFF ENGINEER, GONG

NetSPI came to Xcel Energy Nuclear with the expertise that was needed to review and develop the NEI 04-04 program and to secure our Emergency Response and Control Systems (ERCS).

ABOUT PENTERA

PENTERA

Pentera is the category leader for Automated Security Validation, allowing every organization to test with ease the integrity of all cybersecurity layers, unfolding true, current security exposures at any moment, at any scale. Thousands of security professionals and service providers around the world use Pentera to guide remediation and close security gaps before they are exploited.

56 TOTAL CUSTOMER REFERENCES

VIEW ALL REFERENCES

FEATURED TESTIMONIALS

Pentera is a phenomenal tool that we use to gauge our internal defenses. We look for the worst-case scenario in a breach. What could a threat do if they were able to get in and compromise a system? Pentera allows us to see what could happen and the test results always have great information!

PAUL WIRSZYLA
IT SECURITY ANALYST, SYCUAN CASINO RESORT

Working with Pentera' support team was great, they helped us overcome deployment issues as they arose, always being flexible and responsive. The strong partnership meant there was constant communication to begin with and even now we have regular project reviews.

FRÉDÉRIC PETRUS
IS CONTROL AND VULNERABILITY MANAGER, FORVIA

Pentera enables Quality Assurance of our cyber controls, credentials, vulnerabilities and privileges. It's not enough to rely on the employees and my security systems. I recommend to all security professionals that they look into automating their risk validation practices at scale.

ERAN LIUZZI
CHIEF INFORMATION OFFICER, YIGAL ARNON & CO.

Pentera's return on investment, particularly in terms of the time usually spent on penetration testing, saves me a significant amount of time and money.

FEATURED TESTIMONIALS

The Picus Platform is an easy to use solution that helps us ensure our defenses keep pace with evolving threats. The security scores and insights it provides help us to assess the effectiveness of our controls and identify ways to better protect our assets and customer data. The results we've seen, as well as the high level of support and guidance we receive from Picus' Customer Success Team, were key factors in our decision to recently renew our license. Picus has become the right hand of our security team. I'd recommend it to all organizations that want to strengthen their cyber resilience and automate manual assessment and detection engineering processes.

ELIF SEVEN
SENIOR TEAM LEAD, MIGROS

I recommend the Picus platform to other organizations because, in my experience, it stands out as the most comprehensive validation platform currently available. Its seamless integration with leading cybersecurity controls and user-friendly interface make it an invaluable asset for any organization looking to enhance its security posture. Picus simplifies the complex task of cybersecurity testing and assessment, making it accessible and effective for teams of all levels of expertise.

CAUCCI
ELICA

We choose The Picus Platform to proactively manage our security controls and reduce the manual effort involved in maintaining them. The platform offers better visibility into our security posture and enables us to make informed decisions.

MOHAMED KISHK
AMOUN PHARMACEUTICAL

ABOUT SAFEBREACH

SafeBreach

SafeBreach is a cybersecurity company based in Sunnyvale, California and Tel Aviv, Israel. The company has developed a platform that simulates hacker breach methods, running continuous "war games" to identify breach scenarios across network systems. Their mission is to innovate the way the industry validates security risks from static to continuous, from theoretical to practical.

48   TOTAL CUSTOMER REFERENCES   **VIEW ALL REFERENCES**

FEATURED TESTIMONIALS

Tools like SafeBreach provide a continuous picture of how well you're protecting yourself. Vulnerability scanners miss the mark, penetration testing doesn't go far enough, and compliance tools only provide an isolated, often subjective snapshot of your security posture. SafeBreach, however, provides continuous insight while accurately replicating real-world attack scenarios.

TAL ARAD
CHIEF INFORMATION SECURITY OFFICER, CARLSBERG

SafeBreach constantly challenges my security controls to ensure they are working as expected and improves the quality of the findings of my red teams. It enhances security by identifying potential outbound channels for data, and makes our red teams more efficient and effective by focusing them on the right issues.

SHAHAR BEN-HADOR
CHIEF INFORMATION SECURITY OFFICER, IMPERVA

Assessing the efficacy of security product has frequently been a challenge for security teams. The SafeBreach platform delivers empirical data from the point-of-view of an attacker to accurately and continuously assess security.

BRIAN JOHNSON
SENIOR DIRECTOR OF SECURITY, PAYPAL

It has been very helpful to be able to monitor threats published by CISA and immediately obtain information via the SafeBreach platform about the response of our security controls.

MICHAEL KROPYVA
ASSISTANT VICE PRESIDENT, SOFTSERVE, INC.

FEATURED TESTIMONIALS

Through our networked work with customers, suppliers and the various tools, we offer attackers more and more space. The attack surfaces are larger than ever before and are growing almost exponentially. Every additional digital tool creates new vulnerabilities that allow attackers to find gateways. And this is precisely why cyber security is an issue that concerns us all and will continue to do so in the future.

HARTMUT JENNER
CHIEF EXECUTIVE OFFICER, KÄRCHER

XM Cyber is the only tool that shows me exactly which channels lead to our critical infrastructure. With this knowledge, our cyber experts can take the right measures to protect these channels even better and to sensitize and train the people who use these channels even better.

MICHAEL FICHTNER
CHIEF INFORMATION OFFICER, FC BAYERN MUNICH

Once you have XM Cyber in your environment, once you see the problems, you can't unsee them. That's very powerful. And you can't turn a blind eye to that.

STEPHEN OWENS
GROUP CHIEF INFORMATION SECURITY OFFICER, IQUW

Understanding different attack types and how they move around in an environment, that's really where XM Cyber plays a big part for us.
