WINTER 2025
Customer Success Report

Inventory Management Software Category

Inventory management software helps you track, organize, and manage material purchases, product sales, and other processes. The days of using pencil and paper to track inventory are long gone. Today, you can utilize platforms based on radio-frequency identification (RFID) or barcodes to view where raw materials are placed, when shipments arrive, and when products are shipped.

Inventory management solutions track goods all through the supply chain or the part of it relevant to a company's operations. This covers all phases from warehousing to shipping, production to retail, and the movements of parts and stock in between.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

I'd recommend that any business in our situation take a close look at their inventory and see how they gain more control. For us, there was a smaller learning curve than expected and now we have the hang of it, the software is a lot better than any previous system we've used. It's been a pretty happy experience.

KURT MIGLAS

I'd recommend Unleashed to any business which needs to take control of inventory management quickly, easily and painlessly. We put off choosing a system because we were worried about getting bogged down with a failed IT implementation. Looking back we should have got Unleashed sooner.

JONNY STEEL

I've used other inventory management systems in the past. They work fine, but they're just real clunky. I found reporting was never really what I needed from it. You're always kind of fighting the system just to get what you need out of that. But I don't have that with Unleashed.

We initially thought it would require a huge investment to have a stock management system in place, in order to control our inventory across eBay, Amazon, Rakuten and other marketplaces across Europe. Now that we've found Linnworks we can do this very simply and it's enabled us to do things that we thought only large businesses could do.

EDDIE LATHAM
CO-FOUNDER, VELOCITY OUTLET

SkuVault Core\s helped tremendously for inventory accuracy, time management, and, in the long run, saved money, cause the numbers will always be accurate.

JASON HAVEY
CHIEF OF OPERATIONS, ONNIT

Being able to have the peace of mind to go online and check what's happening on the inventory side and where we stand on orders is very helpful.

Before Sortly, we had no way of tracking inventory—it was extremely arbitrary. Every week I would open up some cabinets and try to see what was missing. Frequently, assistants at our office would just leave sticky notes on my computer telling me we were out of a certain item. Tracking down supplies was frustrating and ordering was extremely inefficient.
