

Load Testing Software Category

WINTER 2025
Customer Success Report

Load Testing Software Category

Load Testing Software is designed to assess the performance and scalability of software applications under different levels of user load. This allows organizations to simulate thousands or even millions of virtual users to gauge how their systems respond to varying traffic conditions.

Benefits of adopting Load Testing Software include the identification of potential performance bottlenecks and vulnerabilities in applications. By subjecting the software to simulated high loads, organizations can ensure that their applications can handle peak user activity without compromising performance. Load testing also helps in optimizing resource allocation, preventing downtime, and enhancing overall user experience. In essence, Load Testing Software ensures the reliability and robustness of applications, offering confidence in their performance under heavy usage scenarios.

Customer Success Report

Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

2025 Customer Success Awards

ABOUT DATADOG

Datadog is a monitoring service that brings together data from servers, databases, applications, tools, and services to present a unified view of the applications that run at scale in the cloud. These capabilities are provided on a SaaS-based data analytics platform that enables Dev and Ops teams to work collaboratively in the infrastructure to avoid downtime, resolve performance problems and ensure that development and deployment cycles finish on time.

FEATURED TESTIMONIALS

“Datadog Cloud Workload Security is helping Zulily with our PCI compliance. File Integrity Monitoring in particular is a standout. Additionally, the insights we get into the security of our Docker and Kubernetes environments will help us find and fix issues faster in the future.”

DANIEL KASEN
LEAD SOFTWARE ENGINEER, ZULILY

“We have customers who were unable to meet their security compliance for their workloads on-premise. But by migrating to the cloud, they have achieved what they never could have or what was cost-prohibitive on-premise.”

ADAM DURBIN
DIRECTOR OF STRATEGY & ARCHITECTURE, CMD SOLUTIONS

“If it hadn't been for our Datadog monitor, we would not have been able to sustain the load [during breaking news] but because of that alert we were able to scale our systems and handle it appropriately.”

STEPHEN ERICKSON
DIRECTOR OF ENGINEERING, THE WASHINGTON POST

“Datadog gives us confidence that there are no blind spots in our cloud architecture. It's our one-stop shop for observability.”

PATRICK HUCK
SENIOR COMPUTER SYSTEMS ENGINEER, LAWRENCE BERKELEY NATIONAL LABORATORY

FEATURED TESTIMONIALS

“During an incident when an engineer has to figure out what's going on and they have multiple tools, there's a high cognitive load that we're making them do. They're having to understand not only the systems they're trying to debug, but how the systems that tell us about the systems interact with one another. They're having to correlate information. They're having to take a look at multiple screens and say something as simple as, are these all on the right time zone? Are we looking at the same information? That place is a high burden on a person. And most incidents aren't taking place when you're at your best.”

ANDREW PROKSEL
DIRECTOR, SITE RELIABILITY ENGINEERING, BLACKLINE

“Using New Relic, my team reduced server load times for our customer-facing website by 50 milliseconds, a 15-percent improvement. Our customers can now browse more quickly and move faster through checkout. Plus we can handle more customers concurrently because everything is loading faster.”

ALI KHAN
DIRECTOR OF TECHNOLOGY OPERATIONS, RENT THE RUNWAY

“With New Relic, we can detect issues in minutes, even under sudden load. For example, during a recent spike on a major customer's storefront, we identified the service causing slowness in less than 15 minutes. New Relic gave us early insights to mitigate the impact and keep our systems stable.”

AMBOJ GOYAL
DIRECTOR OF ENGINEERING, FYND

“With New Relic, we can see issues before they even manifest themselves. During our initial load testing of our new video platform called The Scene, New Relic identified key hotspots, which enabled us to reduce our average response time by 70 percent.”

WILKEN RIVERA
SOFTWARE ENGINEER, CONDÉ NAST

FEATURED TESTIMONIALS

“As a gaming company, we have extremely tight turnarounds for each release. Come launch day, if the game isn't performing well, most players will never come back again. Apica not only provided ongoing load testing and valuable performance recommendations for our Call of Duty "Ghosts" companion app, but created a custom SDLC platform to augment our internal QA resources. You don't want your developers writing tests. It is a huge resource constraint to expect them to do so in addition to their other work. Apica was instrumental in our resource planning.”

KEITH MILLER
TECHNOLOGY DIRECTOR, ACTIVISION

“When this kind of event occurs, it is incredibly important for us to be able to provide useful information to travellers. Having a family member who cannot make it home, or a colleague who cannot get to work, can have an impact on so many people. Our web sites, arlanda.se, swedavia.se and brommaairport.se must be able to take the pressure, stay up, and provide key information to those affected by the crisis.”

ANNA BERGLUND
HEAD OF DIGITAL SERVICES, SWEDAVIA

“Apica Load Test SelfService has given us a clear value in our efforts to create a stable and highly accessible environment. Apica is a supplier that responds to requests for additional functionality and improvements. Several features suggested by us have been implemented in the solution.”

ANDERS ESSBLAD
THOMAS COOK

“Since we started to use Apica, we have a quality-assured user experience and can track availability of internal applications as well as SLA performance of our cloud vendors. We achieved an ROI on the Apica investment in a matter of months.”

TIMOTHY HURD
SENIOR MANAGER, OPERATIONS, SODEXO
