

Adversarial Exposure Validation Software Category

WINTER 2026
Customer Success Report

Adversarial Exposure Validation Software Category

Adversarial Exposure Validation (AEV) is a technique used mainly in machine learning and data science to detect dataset shift or data leakage between different datasets (usually training vs. validation/test datasets). It helps determine whether the model might perform unrealistically well because the datasets are not distributed the same way.

Customer Success Report Ranking Methodology

The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings.

The overall Customer Success ranking is a weighted average based on 3 parts:

CONTENT SCORE

- ✓ Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
- ✓ Customer reference rating score
- ✓ Year-over-year change in amount of customer references on FeaturedCustomers platform
- ✓ Total # of profile views on FeaturedCustomers platform
- ✓ Total # of customer reference views on FeaturedCustomers platform

MARKET PRESENCE SCORE

- ✓ Social media followers including LinkedIn, Twitter, & Facebook
- ✓ Vendor momentum based on web traffic and search trends
- ✓ Organic SEO key term rankings
- ✓ Company presence including # of press mentions

COMPANY SCORE

- ✓ Total # of employees (based on social media and public resources)
- ✓ Year-over-year change in # of employees over past 12 months
- ✓ Glassdoor ranking
- ✓ Venture capital raised

Award Levels

MARKET LEADER

Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

TOP PERFORMER

Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

RISING STAR

Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

FEATURED TESTIMONIALS

“With the Cobalt platform, you fill out exactly what you want them to test, and they're ready for you as quickly as you can be ready. As soon as I gave them the information, they're there, and they identified the resources. It was only a matter of days to get the right resources and kick us off. And once I was up and running, I really loved the way that Cobalt used the Slack channel to keep us updated.”

MANDY HUTH
DIRECTOR OF INFORMATION SECURITY, SMARSH

“Our Cobalt pentesters were a great resource, reporting issues in a clear, professional manner and was responsive to our questions. Overall, we were pleased with their discoveries and responsiveness, which we ultimately used to improve our application code.”

WEI WEI
CHIEF TECHNOLOGY OFFICER, FLUX

“Engagement with Cobalt from the internal teams at Talkdesk was seamless. The information on the reports are very detailed and accurate to help development teams understand what they have to do to correct.”

EDGAR PIMENTA
INFORMATION SECURITY DIRECTOR, TALKDESK

“Cobalt is the new pentesting company in the market and they will be the one in the future.”

DIMITRI BINAZZI
SENIOR DIRECTOR OF SECURITY ARCHITECTURE,

ABOUT ATTACKIQ

ATTACKIQ

AttackIQ was a leading independent vendor of breach and attack simulation solutions, built the industry's first Security Optimization Platform for continuous security control validation and improving security program effectiveness and efficiency. AttackIQ is trusted by leading organizations worldwide to plan security improvements and verify that cyberdefenses work as expected, aligned with the MITRE ATT&CK framework. The Company is committed to giving back to the cybersecurity community through its free AttackIQ Academy, open Preactive Security Exchange, and partnership with MITRE Engenuity Center for Threat-Informed...

69

TOTAL CUSTOMER REFERENCES

[VIEW ALL REFERENCES](#)

FEATURED TESTIMONIALS

“AttackIQ has been very helpful, it has given us a different perspective on what we have in place. Not only from the technology point of view, but people and the process too. We validate with the tool, and we don't announce any of these simulations we do. When we run these simulations, we come across things that we never thought about or could have imagined that there will be a problem with, it could be the technology process. So, it has been really helpful in validating all those three.”

UMA MAHESH REDDY
CISO, PRIME HEALTHCARE

“AttackIQ enables us to be more strategic with our security investments. What should we implement next to drive down risk? Automation is a smarter way of answering that question than manual pen testing because it reduces the cost of testing and increases the thoroughness of assessments.”

MARTIN PETERSEN
CHIEF INFORMATION SECURITY OFFICER (CISO), ISS
WORLD SERVICES

“AttackIQ also stands out because even as it emulates the adversary in its testing process, we can be confident that if we attack a client's production systems, we will not break their workflows. That is a problem for some pen testing tools.”

GUILLEM RAJA
JUNIOR CYBERSECURITY TECHNICIAN, ESED

“The AttackIQ platform greatly accelerates the threat mitigation process. Instead of waiting a month for a penetration test to be completed, we can do it all in one combined workshop. It saves time and money.”

MARK KUHRE JENSEN
GLOBAL INFORMATION SECURITY MANAGER, ISS
WORLD SERVICES

TRUSTED BY
